describes a range of evidence that may help to define this potential new time unit and details key signatures that could be used in its definition These signatures include lithostratigraphical novel deposits minerals and mineral magnetism biostratigraphical macro and micro palaeontological successions and human induced trace fossils and chemostratigraphical organic inorganic and radiogenic signatures in deposits speleothems and ice and volcanic eruptions We include finally the suggestion that humans have created a further sphere the technosphere that drives global change

Strahler,1999-11-01 In this comprehensive treatment of the ongoing conflict between creationists and evolutionary scientists well known geomorphologist Arthur Strahler carefully examines creationists claims of scientific evidence for the six day divine creation of the universe followed by the catastrophic flood of Noah as claimed in Genesis The creationists arguments are examined and evaluated against the findings of mainstream science in the fields of cosmology astronomy geophysics geology paleontology and evolutionary biology Updated with a new preface and responses to recent attacks on evolutionary theory Science and Earth History can serve as both a popular overview of earth history and as a scholarly anecdote to the fictions of creationism once again finding their way into classrooms and universities Strahler illuminates the controversy by reviewing the philosophy methodology and sociology of empirical science as contrasted with the belief systems of religion and pseudoscience The author also includes lucid criteria for distinguishing science from pseudoscience and reviews the great discoveries and developments in science that point to the evolution of life over the earth s three billion year history
