Perspectives on Social Sustainability and Interior Architecture Dianne Smith,Marina Lommerse,Priya Metcalfe,2014-04-30 This book argues that interior architects have a responsibility to practice their profession in collaborative ways that address the needs of communities and of to be the agents of social justice and cultural heritage The

book is divided into three sections based on three pivotal themes community engagement social justice and cultural heritage Each section has chapters that put forward the principles of these themes leading into a variety of fascinating case studies that illustrate how socially sustainable design is implemented in diverse communities across the world The second section includes four concise case studies of community housing issues including remote area indigenous housing and housing for the homeless The third section offers two extensively researched essays on design and cultural heritage a case study of the development of a redundant industrial site and a historical study of gendered domestic interiors The book appeals to a wider audience than the design community alone and challenges mainstream interior design interior architecture practitioners nationally and internationally to take a leading role in the field of socially responsible design The issues raised by the authors are relevant for individuals communities government and non government organisations professionals and students In the twenty first century we seem to have entered into a new world of knowledge discovery where many of the most exciting insights come not from the authority of a traditional discipline but from the dialogue that happens at the hubs and intersections of thought the arenas where different disciplines and approaches different schools and habits of thinking come together to collaborate and contend This collection is a good example of this and I hope the book will be widely read and its lessons learned and applied Tim Costello Officer of the Order of Australia Chief Executive World Vision Australia

**Design for Interior Environments** Susan Winchip, 2007-01-01. Environmentally responsible design has long been of interest and has become a priority in order to offset the effects of global warming and soaring energy costs. While many people are aware of green design, the concept of sustainable development is far more complex. *Sustainable Design for Interior Environments* is the first comprehensive textbook on the subject and is intended for students and instructors as well as practicing designers, architects, contractors and facility managers. Introductory chapters provide a thorough grounding in environmental concerns including the ways in which resources are affected and depleted and the development and effects of legislation. These principles are then put into practice. Strategies for working with natural resources, managing air quality and contaminants and using different materials are discussed. Everything from directing sunlight and determining acoustics to the choice of flooring and fabrics, Case studies incorporate hands on activities to lead students through the design process. Thorough, transformative and tough, *Sustainable Design* is the gold standard text on one of today's most important issues in design. **Handbook of Research on Issues, Challenges, and Opportunities in Sustainable Architecture** Ng,
