Sustainable Development Exploring The Contradictions:

Sustainable Development Michael Redclift, 2002-11-01 Argues that environmental problems need to be looked at internationally in terms of the global economic system and that the degradation of the environment is not natural but an historical process which is intrinsically linked and shaped by economic and political systems **Sustainable Development** M. R. Redclift, 1991 **Routledge International Handbook of Sustainable Development** Michael Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered *Wasted* Michael Redclift, 2020 Sustainable development cannot be achieved solely at the international level Without the creation of more sustainable livelihoods it will remain a utopian and elusive goal Yet given the huge differences in economic development and levels of consumption between North and South how might this be brought about Taking the 1992 Rio Summit as its point of departure *Wasted* examines what we now need to know and what we need to do to live within sustainable limits One of the key issues is how we use the environment converting natural resources into human artifices commodities and services In the process of consuming we also create sinks Today these sinks the empty back pocket in the global biogeographical system are no longer empty The fate of the global environment is indissolubly linked to our consumption particularly in the energy profligate North To understand and overcome environmental challenges we need to build the outcomes of our present consumption rates into our future behaviour to accept sustainable development as a normative goal for societies one that is bound up with our everyday social practices and actions In this absorbing book Michael Redclift argues that the way we understand and think about the environmental conditions our responses and our ability to meet the challenge and discusses tangible policies for increased sustainability that are grounded in recent research and practice MICHAEL Redclift is Professor of International Environmental Policy at the Department of Geography King's

College London He was previously Professor of International Environmental Policy at the University of Keele and before that Professor of Environmental Sociology at Wye College University of London and Director of the ESRC Global Environmental Change Programme He is author and editor of numerous books including Sustainable Development Exploring the Contradictions 1987 Social Theory and the Global Environment 1994 and Sustainability Life Chances and Lifestyles 1999 Originally published in 1996 *Canada and the Crisis of Environmental Destruction* Carleton University. Department of Political Science, 1989 Islamic Operations Management Rafikul Islam, Suhaiza Zailani, Selim Ahmed, 2024-04-16 Managing operations is an integral part of all business and comprises a number of components including quality management production planning supply chain management logistics and inventory control The effective management of operations plays a defining role in enhancing business efficiency and is a lynchpin for success This book explores how Islamic principles and tools can be applied to improve operations management across industries While Islamic banking and finance are established disciplines there is yet little evidence of how exploring operations management from an Islamic lens can improve efficiency Bringing together leading scholars across subdisciplines the Editors fill the long standing gap and address the rising demand for halal products and services by providing a unique perspective to define and enhance an important growing field This book will be a useful reference for those who wish to understand all aspects of Islamic business operations and halal logistics The book will be helpful to academics researchers and upper level students in particular to those who are looking to further their research on how Islamic principles can be applied to business operations **Thinking Ethics in Technology** Carl Mitcham, 1997 *Libri*, 1996 Vols 4 24 include Communications of the International Federation of Library Associations IFLA FIAB Domestic Policy Narratives and International Relations Theory Michael Dalton McCoy, 2000 China is rapidly changing and its role in the world is becoming larger with each transformation As China's economic and political power grows Western nations must develop better ways of dealing with Chinese ambitions on the world stage In this compelling work Michael McCoy urges American policy makers to move beyond past perceptions of China as a political threat and an economic gold mine to consider Chinese political identity and actions from a Chinese perspective He investigates American and Chinese interpretations of various sociopolitical concepts arguing that a discernment of the different meanings is necessary to understand subsequent actions and avoid confusion and fear Specifically McCoy explores how Chinese domestic policy narratives reflect Chinese political identity which in turn authorizes specific actions at the national and international level Using post modern discourse analysis he examines the implementation of a Chinese domestic policy known as Ecological Agriculture considering it as ritual myth and metaphor His analysis reveals the power relations and forms of interaction within and between diverse social groups that are an integral part of Chinese political identity and culture Highly original and insightful McCoy's study will be of great value to those with an interest in Chinese development international relations comparative politics and policy analysis **Environmental Economics and Policy** Thomas H. Tietenberg, 2004

This book is the premier introductory environmental economics text for non majors Key chapters are extracted from the author s longer book Environmental and Natural Resource Economics the best selling text in the field This compact text provides a concise introduction to economic theory then moves on to policy based chapters Each policy chapter discusses relevant environmental and political background and then applies the critical economic concepts to real world examples By including both basic theory and in depth issues based applications this book is ideal for a wide range of courses in environmental and natural resource economics

Environmental Issues and Business Sally Eden,1996-12-09 Business is increasingly interested in responding positively to environmental issues in the 1990s The nature of this response deserves closer academic attention because it influences not only business operations but also the wider context of policy public opinion and environmental concern Environmental Issues and Business details the dimensions of the business response to environmental issues by taking a critical social science perspective to this dynamic area It catalogues the pressures upon business to take up environmental activities and then assesses those activities in terms of company culture communication and influence on the environmental agenda Using examples from the UK the USA and Europe the author examines the diversity of business activities and evaluates their impact according to policy developments and the restoration of public confidence Environmental policy and auditing environmental advertising and marketing and environmentally based communications illustrate how business has approached this difficult task This milestone text provides essential reading for students and researchers of environmental and business studies
