New Forms of Civic Resistance and Activism Tine Munk, Elliot Doornbos, Ian Mahoney, 2025-12-16 This interdisciplinary collection examines how contemporary movements are reshaping political, social and environmental landscapes through both online and offline means, including creative expression and grassroots mobilisation. This book analyses non-violent activism, political resistance, mobilisation, responses to hate and environmental activism. It brings together a wide range of academic perspectives with contributions from scholars and practitioners across the social sciences and humanities, political science, the natural sciences and environmental studies. By examining the synergy between online and offline actions, it highlights how these actions are interconnected with online platforms and virtual spaces, and in doing so, it addresses the urgent need for compelling and legitimate civic resistance strategies in the modern world. It explores the intersection of digital platforms and real world action, providing fresh insights into how activism is increasingly transcending geographical, technological and conceptual boundaries. **New Forms of Civic Resistance and Activism** will appeal to scholars and students of criminology, social and political science, environmental studies, media and communication studies, cybercrime and cyber security. It will also interest activists, policymakers, practitioners and general readers who are curious about contemporary social movements. This book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY NC ND 4.0 license.

**The Rise of the Sharing Economy** Kevin Govender, 2021-09-27 Is access the alternative to ownership? In 2011, the sharing economy was dubbed by Time magazine as one of the Ten ideas that will change the world, and it has been widely hailed as a major growth sector by sources ranging from Fortune magazine to the World Economic Forum to former President Obama.

The sharing economy is a new economic model that focuses on access to assets or resources instead of ownership. It has exploded in popularity over recent years and has disrupted a significant number of mature industries such as accommodation, automotive and entertainment. The total value of the global sharing economy is estimated to grow from 14 billion in 2014 to 335 billion by 2025. With limited resources and a desire to become more environmentally conscious, the high cost and burdens of ownership and a rapidly growing population living increasingly in densely populated cities, consumers are faced with greater challenges and opportunities to fill their consumption needs. People are experiencing a significant value shift with a desire to reconnect with products and services in a more meaningful way, becoming more cost and environmentally conscious and prioritising experience over ownership. An organisation's ability to reimagine and reinvent its business model to offer unique opportunities for humanising technology and developing innovative sharing platforms such as Uber and Airbnb would be a game changer for them. While the Fourth Industrial Revolution and COVID 19 pandemic are influencing and changing consumer behaviour, organisations are facing a dilemma that is affecting the future of their profitability, existence and sustainability. In 'The Rise of the Sharing Economy', Kevin Govender shares his insights and expertise on the evolution of the sharing economy, consumer behaviour and alternative business models, and empowers consumers to rediscover and realise the enormous benefits of access over ownership and the potential savings in time, money, space and the opportunity. Access is a cultural and socio-economic phenomenon that is transforming businesses, consumers, the way we live, work, learn, consume, commute and play. Access is the new ownership. *Film Production eBook* GURMEET SINGH DANG,

**Cultural Funding and Financing** Carolina Dalla Chiesa, Anders Rykkja, 2026-01-03. This edited open access volume offers a comprehensive analysis of new and traditional funding models for the arts and culture. In the economic and political contexts of reduced art funding, the book takes an objective, pragmatic and heterodox approach to demonstrate how financial sustainability in the arts can be achieved via a range of top down and bottom up mechanisms which are valued either in terms of institutional or crowd-based legitimacy. The book aims to offer both a scholarly interpretation of established and emerging funding and financing practices within the cultural and creative sector, as well as guidance for artists, creators and cultural programmers through various case studies and multiple examples of current practices. Contributions are divided into three sections. Section one outlines the most important traditional tools and models, while the second part covers the key contemporary practices premised on the use of digital platforms, and the final part introduces several case studies. The objective of this volume is to demonstrate that while traditional models show no signs of being supplanted, digitalisation has facilitated the emergence of new forms. Such an evolution has consequences for creators of works as well as those willing to support them. The contributions address these issues by investigating and analysing the individual or combined adoption of traditional and new funding and financing models in a post-digital context. *Europe Tourism eBook* GURMEET SINGH DANG, *De Gruyter Handbook of Media Economics* Ulrike Rohn, M. Bjørn Rimscha, Tim Raats, 2024-05-20. The handbook

**The Four Competitive Business Drivers** Jorge Sá, Magda Pereira, 2026-01-13 Sometimes management books achieve a clear cut distinction between strategy and tactics Seldom they include the business model as a third competitiveness driver And never so far has the theory of business been considered as a fourth required performance vector different from all other three However organizational optimization requires all four the why where what and how The theory of business Drucker is the why the company makes sense The reality assumptions the organization is grounded upon What it is paid for The business model Porter is the what the basic pillars of a firm's organization How it transforms client satisfaction into value for itself Strategy Joffre is the where the choice of 1 geographical areas 2 industries and 3 within them of segments And tactics is the how respecting to the nine functional areas from marketing Kotler to human resources to how to advertise how to motivate etc Four inferences follow All four drivers are necessary conditions none sufficient They interrelate some impacting on others They must fit reinforcing each other and They should be periodically reviewed under a sequence of steps This is illustrated by the book's detailed examples of e.g. Nike, Dollar Shave Club, Spotify, SpaceX, Vend, me, Sears, IBM, Apple Music, McDonald's, Marks, Spencer, Canva, SolarCity, Farfetch, etc. The fundamental message is that neglect of any of the four drivers brings efficiency doing things right the Phronesis of Aristotle at the cost of lower effectiveness doing the right things the Chokhmah of Solomon With more and more resources producing less and less underperformance will follow
