Hill,1979 Secondary School Reading presents carefully thought out practical strategies for promoting the development of  
reading skills at the post elementary level Practical applications are presented through their relationship to the theoretical  
conception of the total reading learning process as they relate to the learner s needs Reading instruction in the secondary  
school is essentially different than elementary instruction in the school The older young people have different needs and  
interests and utilize different cognitive strategies This volume presents strategies for older learners which reflects a  
thorough knowledge of both reading and teaching as well as many years of experience in teaching this level Secondary  
School Reading is a good blend of theoretical constructs and practical application Its examples offer the teacher many ideas  
for learning activities Its appendices direct the reader to many sources of information and teaching materials      **Specific

students either with new tests or new applications of tests All argue that at this very critical time it is imperative that  
educators be very knowledgeable about assessment and the ways assessment information is used to make decisions about  
students The book is intended for a first course in assessment for those whose careers require understanding and informed  
use of assessment data The primary audience comprises those who are or will be teachers in special education at the
