### **Sensing Technology: Current Status and Future Trends II**

Alex Mason,Subhas Chandra Mukhopadhyay,Krishanthi Padmarani Jayasundera,Nabarun Bhattacharyya,2013-12-09 This book is written for academic and industry professionals working in the field of sensing instrumentation and related fields and is positioned to give a snapshot of the current state of the art in sensing technology particularly from the applied perspective The book is intended to give broad overview of the latest developments in addition to discussing the process through which researchers go through in

order to develop sensors or related systems which will become more widespread in the future Surface Acoustic Wave Devices in Telecommunications Ken-Ya Hashimoto,2013-04-17 Although the existence of the surface acoustic wave SAW was first discussed in 1885 by Lord Rayleigh 1 it did not receive engineering interest for a long time In 1965 the situation changed dramatically White suggested that SAWs can be excited and detected efficiently by using an interdigital transducer IDT placed on a piezoelectric substrate 2 This is because very fine IDTs can be mass produced by using photolithography which has been well developed for semiconductor device fabrication and proper design of the IDT enables the construction of transversal filters with outstanding performance Then in Europe and America a vast amount of effort was invested in the research and development of SAW devices for military and communication uses such as delay lines and pulse compression filters for radar and highly stable resonators for clock generation Research activities are reflected in the various technical papers represented by special issues 3 5 and proceedings 6 The establishment of design and fabrication technologies and the rapid growth of digital technologies represented by the microcomputer meant that the importance of SAW devices for the military decreased year by year and most researchers in national institutions and universities left this field after reductions or cuts in their financial support Then the end of the Cold War forced many SAW researchers in companies to do so too
