Apple Watch College Rankings In The Us:

Audit Culture Cris Shore, Susan Wright, 2024-02-20 A new and compelling argument for why so many institutions continue to be spellbound by rankings and metrics despite the cultural carnage they cause. How can we halt this death by audit? The authors develop a radical agenda that will strike fear into number loving technocrats around the world. Peter Fleming, author of *Dark Academia: How Universities Die* A powerful and definitive critical diagnosis of the effects of audit culture on individuals, organisations and society. Essential reading. Michael Power, Professor LSE A visionary book. Marilyn Strathern, Emeritus Professor, University of Cambridge All aspects of our work and private lives are increasingly measured and managed. But how has this audit culture arisen and what kind of a world is it producing? Cris Shore and Susan Wright provide a timely account of the rise of the new industries of accounting, enumeration and ranking from an anthropological perspective. *Audit Culture* is the first book to systematically document and analyse these phenomena and their implications for democracy. The book explores how audit culture operates across a wide range of fields including health, higher education, NGOs, finance, the automobile industry and the military. The authors build a powerful critique of contemporary public sector management in an age of neoliberal market making, privatisation and outsourcing. They conclude by offering ideas about how to reverse its damaging effects on communities and restore the democratic accountability that audit culture is systematically undermining. Cris Shore is Emeritus Professor of Social Anthropology at Goldsmiths University of London and Research Fellow at the Institute for Advanced Study Central European University. One of his recent publications is *The Shapeshifting Crown*. Susan Wright is Professor of Educational Anthropology at Aarhus University Denmark. One of her recent books is *Enacting the University*. Together they are co-editors of the Stanford Anthropology of Policy book series *Predatory Value Extraction*.

William Lazonick, Jang-Sup Shin, 2020 This book explains how an ideology of corporate resource allocation known as maximizing shareholder value (MSV) that emerged in the 1980s undermined the social foundations of sustainable prosperity in the United States, resulting in rising inequality and slow productivity growth and sets out an agenda for restoring sustainable prosperity. *The Ordinal Society* Marion Fourcade, Kieran Healy, 2024 Organizations now measure and rank nearly every aspect of our lives using data to make predictions about our purchasing power, tastes and character. *The Ordinal Society* shows how these predictions structure life chances, producing a hollow morality that launders familiar forms of social advantage into an illusion of merit. **Whiteness in the Ivory Tower** Nolan L. Cabrera, 2024 Whiteness is the foundation of racism and racial violence within higher education institutions. It is deeply embedded in the ideologies and organizational structures of colleges and universities that guide practices, policies and research. The purpose of this book is not to simply uncover these practices but rather to intentionally center the harm that Whiteness causes to communities of Color broadly in order to transform these practices. For example, Cabrera explores what academic freedom and tenure could look like if they actually divorced themselves from Whiteness. Readers will dive into these and other pressing issues guided by both critical

social analysis as well as hope for the possibilities of human liberation from oppression This is important reading for university and college professors scholars diversity officers student affairs professionals and everyone looking for ways to center the needs of historically marginalized students Book Features Extends the work of Beverly Daniel Tatum classic text Why Are All the Black Kids Sitting Together in the Cafeteria Explores what truly embedding anti racism and decolonial praxis into higher education institutions could look like Uses critical race theory to analyze the cause of racism and the effect Whiteness has on people of Color Offers a critical but concurrently hopeful view that anti racist futures are both possible and necessary *USA Today Index*, 1993 *America*, 1911 **The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces**, 1906 **American Agriculturist**, 1900 **The Journal of the American Osteopathic Association**, 1910 **Scientific American**, 1919 **The American Garden**, 1882 **Scientific American Supplement**, 1919 **The Keystone**, 1919 **The Illinois Medical Journal**, 1922 **Army-Navy-Air Force Register and Defense Times**, 1924 **Appletons' Cyclopædia of American Biography** James Grant Wilson, John Fiske, 1889 **Illinois Medical Journal**, 1922 **Appletons' Cyclopædia of American Biography** James Grant Wilson, John Fiske, 1889 **Our Navy, the Standard Publication of the U.S. Navy**, 1917 **Barrel and Box and Packages** Edgar Harvey Defebaugh, 1929
