We provide an extensive systematic review of its capabilities and hope that both professors and students use it as a helpful guide to return to frequently. For professors, it can design courses, create syllabi, and content including lecture slides and assignments, help with grading, and with student understanding. For students, it can explain complex concepts, create and debug code, and create sample exam questions. Overall, we find that writing and debugging code and grading are the greatest strengths of ChatGPT for educational and research purposes. However, it has limitations including that it often makes errors and requires a deeper or an advanced knowledge of the domain. Finally, the discussion of ChatGPT in business education and research also raises problems regarding bias and plagiarism.
