Almost everything that is. Anyone who has ever tried to find a definitive way to rank players for their fantasy draft or worse find dollar values for auction style leagues knows the difficulty of finding a system that works for their leagues. Because leagues vary according to size, rules, and scoring systems, a player who may be a valuable commodity in one league may be below average in another. Therefore the one size fits all rankings or valuations that you see most places can be useless. And even if those rankings were designed specifically for leagues like yours, values and rankings are normally assigned in a subjective manner without any mathematical evidence to
