Beginning Google Maps Applications with Rails and Ajax

Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis, 2007-05-02. The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm. *Beginning Google Maps Applications with Rails and Ajax* From Novice to Professional is the first book to comprehensively introduce the service from a developer perspective, showing you how you can integrate mapping features into your Rails driven web applications. Proceeding far beyond simplistic map display, you'll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world. The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations, adding comments and building community driven maps. You'll want to pick up a copy of this book because This is the first book to comprehensively introduce the Google Maps application development using the Rails development framework. You'll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release. It is written by four developers actively involved in the creation of location based mapping services. For additional info, please visit the author's reference site for this book.

Beginning Google Maps Applications with PHP and Ajax

Jeffrey Sambells, Michael Purvis, Cameron Turner, 2007-12-22. Until recently, building interactive web-based mapping applications has been a cumbersome affair. This changed when Google released its powerful Maps API. *Beginning Google Maps Applications with PHP and Ajax* was written to help you take advantage of this technology in your own endeavors whether you're an enthusiast playing for fun or a professional building for profit. This book covers version 2 of the API, including Google's new Geocoding service. Authors Jeffrey Sambells, Cameron Turner and Michael Purvis get rolling with examples that require hardly any code at all, but you'll quickly become acquainted with many facets of the Maps API. They demonstrate powerful methods for simultaneously plotting large data sets, creating your own map overlays and harvesting and geocoding sets of addresses. You'll see how to set up alternative tile sets and where to access imagery to use for them. The authors even show you how to build your own geocoder from scratch for those high volume batch jobs. As well as providing hands-on examples of real mapping.

Newsweek, 2008 The American Philatelist, 2004 World Regional Geography without Subregions Lydia Mihelic Pulsipher, Alex Pulsipher, Patricia L. Price, 2013-12-20 Alone among books for the regional geography course Pulsipher and Pulsipher's World Regional Geography humanizes geographical issues showing how larger geographical forces affect the lives of individuals and communities around the globe. Students explore the field's defining concepts by focusing on the stories of real people, global trends and interregional linkages and contemporary topics that transcend regional borders: the war on terrorism, global political order, interregional trade, the global economy, popular culture, the environment and the Internet. Along with a thorough updating, this edition introduces several new features that will help students explore geography across regions while enhancing the book's standing as the most highly visual textbook for the world regional course **Forbes**, 2002 **Searcher**, 2004-06 **Discovering Computers** Gary B. Shelly, Thomas J. Cashman, Misty Vermaat, Jeffrey J.
