Jon Wertheim, 2021-06-15 A rollicking guided tour of one extraordinary summer when some of the most pivotal and freakishly coincidental stories all collided and changed the way we think about modern sports The summer of 1984 was a watershed moment in the birth of modern sports when the nation watched Michael Jordan grow from college basketball player to professional athlete and star That summer also saw ESPN's rise to media dominance as the country's premier sports network and the first modern commercialized profitable Olympics Magic Johnson and Larry Bird's rivalry raged Martina Navratilova and John McEnroe reigned in tennis and Hulk Hogan and Vince McMahon made pro wrestling a business while Donald Trump pierced the national consciousness as a pro football team owner It was an awakening in the sports world a moment when sports began to morph into the market savvy sensationalized moneyed controversial and wildly popular arena we know today In the tradition of Bill Bryson's *One Summer America 1927* L Jon Wertheim captures these 90 seminal days against the backdrop of the nostalgia soaked 1980s to show that this was the year we collectively traded in our ratty Converse for a pair of sleek heavily branded ingeniously marketed Nikes This was the year that sports went big time *The Value of History* Paul F Frank Beisbier, 2019-07-09 The work that is about to be surveyed by the reader represents decades of painstaking work to provide him or her with the most positive and freshest perspective with respect to what the discipline of history teaches him or her to improve the quality of not only his or her daily life but also those of all other whom he or she comes into contact with This task is accomplished when he or she becomes aware of the fact that the greatest possible good can only be achieved through the promotion of the adequate satisfaction of the greatest number of needs of the maximum number of people within the context of its being mutually beneficial to all parties involved Furthermore the reader of this volume gains the widest perspective on how the above assertion is valid for and has a positive impact on all fields of human endeavor individual human lives and human institutions since the content of historical subject matter consists of nothing less than the past and present record of all the events and developments of the above entities Thus since everything that people learn is through past and present experiences history teaches them everything and nothing can be perceived outside the framework of its subject matter To present a graphic example to the reader of this volume to clearly illustrate the truth and validity of the above points the author has used the comparison and contrast of the values beliefs and cultures of two very different societies in variant times and places to do so The retrograde valuing of power and wealth placed on them by a small elite in European medieval society resulting in limited social mobility in a primarily agrarian society is in marked contrast to the emphasis on limited individual freedom within the framework of the rule of law as espoused by modern America Within the latter framework it was possible to develop a modern industrial

and postindustrial community to provide individual social advancement through educational and employment opportunities as well as through the availability of quality health care Finally through all that has been stated above it is worthwhile for society at large as well as the academic community to peruse through the contents of this volume in order to accomplish the above objectives
