Super Brain User Manual:

Self-Reliant Pilot Bill Quirk, 2015-07-13 Color illustrated Self Reliant Pilot focuses on flying small taildragger aircraft and landing them in remote and challenging terrain in wild Alaska. It displays the inspiration of flying in Alaska defining who are the incredible pilots that fly Alaska's backcountry and showing the training necessary to become the best pilot you can be. It discusses the weather related problems of flying in Alaska and shows ways to minimize the difficulties. It also discusses the elevated aircraft accident rate in Alaska and how to substantially reduce such incidences. Self Reliant Pilot serves as a primer for Alaskan style training. Once a pilot learns how to train according to the book additional or new training can be carried out without difficulty because the pilot has already learned the foundation for training. Self Reliant Pilot is a classical training manual because it is written in a contemporary style that is always current. As time goes forward the strategy for training will remain the same. Seventy five distinctive narratives in the last part of the book show general aviation topics and authenticated experiences of a skilled pilot flying Alaska's uninhabited backcountry. The narratives include the inspiration of flying Alaska's coastal mountains, glaciers and fjords flying and landing in Alaska's backcountry in winter on skis and in summer on Bushwheels flying wildlife surveys and observing rare wildlife encounters.

Do you find it hard to put names to faces? Does your mind wander? Do you often lose focus and feel less productive in the afternoon? Do you struggle with simple math? Or walk into a room having forgotten what you meant to do there? You are not alone and Super Brain can help. Like the rest of your body, your brain responds to a good workout. Yet few of us take time for mental gymnastics. Your brain is a stupendous living thing, able to repair itself and to create new pathways of thought and memory. The more you stimulate and exercise your mind by trying out different ways of thinking, the better your powers of concentration, memory, creativity and overall mental agility will become and remain, regardless of age and natural abilities. But if you don't use it, you lose it. Your brain needs looking after.
