Concrete Solutions Michael Grantham, 2016-09-19 Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions the 6th International Conference on Concrete Repair Thessaloniki Greece 20-23 June 2016 Strengthening and retrofitting are major themes in this volume with NDT and electrochemical repair following closely discussing the latest advances and technologies in concrete repair The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly Concrete Solutions is an essential reference work for those working in the concrete repair field from engineers to architects and from students to clients The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St Malo France in association with INSA Rennes Subsequent conferences have seen the Series partnering with the University of Padua Italy in 2009 with TU Dresden Germany in 2011 and with Queen's University Belfast Northern Ireland in 2014 In 2016 Thessaloniki Greece hosted the conference partnering with both Aristotle University of Thessaloniki AUTH and Democritus University of Thrace DUTH The next conference in the series will be held in 2019 in Istanbul

Advances in Human Aspects of Transportation: Part I Neville Stanton, Giuseppe Di Bucchianico, Andrea Vallicelli, Steven Landry, 2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which

includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system

Nature-based Solutions for Resilient Ecosystems and Societies Shalini Dhyani, Anil Kumar Gupta, Madhav

Karki, 2020-07-07 Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia. These disasters lead to substantial loss of life, livelihoods and community assets which not only threatens the pace of socio-economic development but also undo hard earned gains. Extreme events and disasters such as floods, droughts, heat, fire, cyclones and tidal surges are known to be exacerbated by environmental changes including climate change, land use changes and natural resource degradation. Increasing climate variability and multi-dimensional vulnerabilities have severely affected the social, ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt. Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities severely impact the ecosystems and Nature's Contributions to People (NCP) and thereby to human well-being. Long-term resilience building through disaster risk reduction and integrated adaptive climate planning therefore has become a key priority for scientists and policymakers alike. Nature-based Solutions (NbS) is a cost-effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change adaptation while also providing a range of co-benefits like sustainable livelihoods and food, water and energy security. This book discusses the concept of Nature-based Solutions (NbS) both as a science and as art and elaborates on how it can be applied to develop healthy and resilient ecosystems locally, nationally, regionally and globally. The book covers illustrative methods and tools adopted for applying NbS in different countries. The authors discuss NbS applications and challenges, research trends and future insights that have wider regional and global relevance. The aspects covered include landscape restoration, ecosystem-based adaptation, ecosystem-based disaster risk reduction, ecological restoration, ecosystem-based protected areas management, green infrastructure development, nature-friendly infrastructure development in various ecosystem types, agro-climatic zones and watersheds. The book offers insights into understanding the sustainable development goals (SDGs) at the grass roots level and can help indigenous and local communities harness ecosystem services to help achieve them. It offers a unique essential resource for researchers, students, corporations, administrators and policymakers working in the fields of the environment, geography, development, policy, planning, the natural sciences, life sciences, agriculture, health, climate change and disaster studies.

Men, Masculinities and Disaster Elaine Enarson, Bob Pease, 2016-06-17 In the examination of gender as a driving force in disasters too little attention has been paid to how women's or men's disaster experiences relate to the wider context of gender inequality or how gender justice practice can help prevent disasters or address climate change at a structural level. With a foreword from Kenneth Hewitt and an afterword from Raewyn Connell and contributions from renowned international experts this book helps address the gap. It explores disasters in diverse environmental, hazard, political and cultural contexts through original research and theoretical reflection building on the under-utilized orientation of critical men's studies. This body of thought not previously applied in disaster contexts

explores how men gain maintain and use power to assert control over women Contributing authors examine the gender terrain of disasters through men s eyes considering how diverse forms of masculinities shape men s efforts to respond to and recover from disasters and other climate challenges The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men It concludes by examining how disaster risk can be reduced through men s diverse efforts to challenge hierarchies around gender sexuality disability age and culture
