Exercise 2  

Question

After collecting the data, the teacher provides each student with a copy of the following table. Each student is asked to complete the table with the data from the class.

Explanation

Row: The first input following an introductory phrase concerning an action must be the person or thing that could do that action.

Identify the action in the introductory phrase. Then choose the action in which the independent clause begins with the word that does the action.

Answer

After collecting the data, the teacher provides each student with a copy of the following table. Each student is asked to complete the table with the data from the class.

The sentence that immediately follows the introductory phrase 'After collecting the data' must be something that someone does. Because the thing that collects data is the teacher, the correct answer must start the independent clause with the subject *the teacher*.

Therefore, the answer that does complete the sentence correctly is 'the teacher provides each student with a copy of the following table'.
