Beyond Banks Dan Awrey, 2024-10-22 How new technology is rapidly changing the nature of money and the way we pay A diverse and growing range of financial institutions and platforms from PayPal and Venmo to WeChat Alipay and the brave new world of stablecoins has harnessed new technology to disrupt the system of money and payments as we know it Beyond Banks explains why this disruption holds out the promise of faster cheaper more convenient and more secure payments but also how it increasingly risks exposing consumers businesses and governments to the problem of bad money Dan Awrey traces the origins of our current bundled system of banking money and payments He explains why the problem of bad money the result of antiquated and inadequate laws and regulation that fail to establish credible commitments to hold transfer or return a customer's money on demand requires that policymakers fundamentally rethink their approach toward the design of the laws and institutions at the heart of this system He presents

ways to effectively unbundle banking from money and payments ensure the credibility of monetary commitments and promote the stability of this system. Awrey also envisions a more forward looking role for policymakers in encouraging greater technological experimentation, competition and innovation in the realm of payments. Beyond Banks sheds critical light on the important but too often dysfunctional relationship among technology, regulation and money and lays the foundations for a safer, more nimble and more inclusive system of money and payments.
