Coming financial technology innovations could improve the quality of life for all people Over the past few decades digital technology has transformed finance Financial technology fintech has enabled more people with fewer resources in more places around the world to take advantage of banking insurance credit investment and other financial services Marion Laboure and Nicolas Deffrennes argue that these changes are only the tip of the iceberg A much broader revolution is under way that if steered correctly will lead to huge and beneficial social change The authors describe the genesis of recent financial innovations and how they have helped consumers in rich and poor countries alike by reducing costs increasing accessibility and improving convenience and efficiency They connect the dots between early innovations in financial services and the wider revolution unfolding today Changes may disrupt traditional financial services especially banking but they may also help us address major social challenges opening new career paths for millennials transforming government services and expanding the gig economy in developed markets Fintech could lead to economic infrastructure developments in rural areas and could facilitate emerging social security and healthcare systems in developing countries The authors make this case with a rich combination of economic theory and case studies including microanalyses of the effects of fintech innovations on individuals as well as macroeconomic perspectives on fintech's impact on societies While celebrating fintech's achievements to date Laboure and Deffrennes also make recommendations for overcoming the obstacles that remain The stakes improved quality of life for all people could not be higher
