## **Tackling Autism Behaviors Travis Breeding:**

*Tackling Autism Behaviors* Travis Breeding, 2015-12-08 Travis talks about addressing behavior issues in people with autism. It is important to realize behaviors are a way of communication. Behaviors always have a cause. It will be easier to help people with autism if we know what is causing their behaviors. If we can work on what is causing the behavior issues then we will not have to worry so much about the behavior. It is important to find a cause for the behavior. Behaviors do not always need to be eliminated. There are some behaviors that we can just modify. In this book Travis tells the story of an autistic teenager who had a fetish in girls' feet. He would walk up to them and tell them they had pretty feet and this was not appropriate. However, understanding that the teenager had a basic human need that he needed met, Travis was able to redirect the behavior to a more positive behavior. You will see how Travis addressed the teenager's behavior issue and helped him express himself in more appropriate ways. Behavior is communication. Travis shares with the reader how to tackle challenging autism behaviors. Travis gives the reader several tips on dealing with challenging behaviors and uses his own life as an example in how to deal with what is causing the behaviors. It is important to remember that it is easier to help a person address their basic human needs and work on what is causing the behavior before working on eliminating the behavior itself. Finding a solution or fixing what is causing the behavior can save you time, energy, and effort in addressing the behavior. So when you are working with someone with autism, remember to ask the question: What is causing the behavior? Here is an excerpt from the book: Behavior is always communication. Behavior is someone trying to communicate that they have a basic human need that is not being met. If someone moves something because it is in a place that they have set in before, then they are exhibiting the behavior of moving the object you place in spot because that is their spot where they have always set it. It is important to remember in nearly every instance we see a behavior, we have to look for and find the root cause of the behavior. If something is in my way, then I need to use a behavior to move the subject out of my way so that I can have my spot back. If someone is standing in my way and I cannot talk to ask them to move, then my aggressive behavior towards them might be a way for me to communicate that I have a very basic human need. I need to be able to communicate to someone that they are in my way, but if I am unable to get someone to notice that they are in my way, then I will have a significant behavior problem.

**How Anthem Kills Children with Autism** Travis Edward Breeding, 2016-03-09 Anthem insurance continues to cut and deny applied behavior analysis services in the state of Indiana As the leading insurer in the state of Indiana Anthem should be held accountable to provide adequate treatment for autism for it s clients Anthem works together with Family and Social Services as well as the Autism Society of Indiana to deny or cut ABA services for children with autism This book exposes the conspiracy theory behind Family and Social Services Anthem and the Autism Society of Indiana In this book you will learn that Anthem s medical reviewers that are signing off on and approving or denying behavior plans are not even ABA therapist themselves We have psychiatrists who do not have a clue as to what autism is signing off on behavior plans when they have no experience at all in dealing with autistic behaviors This is crazy and Travis hopes to draw attention to the level of bullying that Anthem is doing Travis feels Anthem is more concerned with making a profit for its shareholders than it is in treating people with autism like himself Travis shares how many parents feel trapped because they are not able to speak up or really

advocate for their children out of fear that Anthem will cut their children's services even more Anthem is engaging in very dangerous behavior that has the potential to hurt or kill thousands of children with autism and they must be stopped This book exposes the wrong doings of Anthem insurance and explains how they have formed connections with Family and Social Services in the state of Indiana along with forming a collation with the Autism Society of Indiana to work to prevent children with autism from getting applied behavior analysis or social skills coaching This is a great book from someone living on the autism spectrum who understands what kind of treatment people with autism need Here is an excerpt from the book I also find it rather interesting that the medical reviewers at Anthem are not even ABA Therapist Yes a Psychiatrist with no training in Autism or ABA therapy is reviewing behavior plans and deciding how many hours a child with autism needs and should receive of ABA therapy The decision about rather a child should receive ABA therapy or not is being made by an uneducated person who has not even met the child or the child's therapist in person If they are going to be deciding how many hours of ABA therapy that a child with autism should receive then they should at least observe the child and know the child before determining how many hours the child is going to receive

**I Am NOT Like the Other Kids But That Is Okay with Me** Travis Breeding, 2013-11-03 Growing up I began to realize that I was different from my peers At first this bothered me and hindered the development of my self esteem As I got older I started to realize that this was not a big deal and it began to bother me less and less I began seeking out other ways to become involved in things that would help me feel connected to my peers Participating in music was my outlet As I continued to age I found that I was more like my peers than I thought The issue was that my peers did not understand me or some of my behaviors because they did not have a good understanding of what Autism Spectrum Disorders were While it was still difficult for me to connect with my neurotypical peers the more I aged the better life became for me There were still many challenges and roadblocks to tackle but I was starting to find some self worth in my music and playing the trombone I found that special interest that would help me excel in school My special interest saved my entire high school experience from being a complete disaster This book shares how I used my special interest to help cope with having autism and to defeat my fears that the other kids all thought I was different

**Boosting Your Self-Esteem Through Imagination** Travis Breeding, 2013-10-31 The mind can be a powerful tool This can be both good and bad We are all familiar with the saying we can be our own worst enemy and that is true but the flip side of that is that we can also be our own best supporter and advocate I've been learning about this in my day to day life The way that mind processes thoughts is an important part of the development of our self esteem Just a few short months ago I was dealing with some depression from all of the negative going on in my life Some of the thoughts that were going through my head on a daily basis were girls hate me why do they hate me People don't like me because I have Asperger's Syndrome The negative thoughts were overwhelming and it was becoming more difficult to see the positive side of life I have dealt with this throughout my life as an adult due to the complications of socialization and making friends I have had many ups and downs

and I kept trying to stay positive The negative days were still present and were interfering with my ability to do the everyday things that an adult needs to do in life to support himself and be productive It wasn't until recently when things began to turn around for me My life has taken on and expanded in areas that I never thought I'd see myself grow in My social skills set have improved a lot in the past month or two and I am now a lot more content with life My thoughts are positive thoughts and there are no negative thoughts If one occurs I have learned how to quickly defeat that negative thought and turn it into a positive one I do this by behavioural modification Just like with any behaviour it's important to modify it instead of taking it away completely Taking behaviour away completely can lead to many destructive things occurring It's important that when dealing with children we see what the behaviour is and then come up with a plan to modify or change the behaviour The same is true for thoughts We want to avoid all of the negative thoughts that we can We can't always just make those thoughts go away They need to be replaced with a more positive thought Cognitive Behaviour Therapy is a powerful tool for turning negative thoughts into positive thoughts I myself have benefited from Cognitive therapy more than anything else I've tried This book is a tool for helping someone with Autism develop their self esteem and confidence Great read for parents and educators as well as adults and children with Autism *Autism Context of Reinforcement* Travis Breeding, 2018-09-28 Travis introduces the reader to social context and social thinking in relation to autism spectrum disorder The reader will learn how we use social thinking to interpret social context to understand how to generalize and apply social skills in different social environments successfully Travis also describes how behavior therapists can learn to teach social thinking and social context strategies in young learners with autism by providing positive reinforcement in different social contexts A child is not always going to get a candy bar or a high five for master a skill or improving a behavior The last thing Travis feels we want is a child thinking he deserves this over generalized amazing award just for doing something nice for someone else In this book Travis will teach you how to teach young learners with autism how to generalize positive reinforcement and decipher it in different social contexts so that they learn to recognize all kinds of positive reinforcement in all social environments The Apology Travis Breeding, 2016-12-08 Travis writes a heartfelt apology to the autism community for the way he behaved in the past due to his mental illness that magnified autism issues and made autism appear to be worse than what it really was Now that Travis has answers and a full picture of what he is dealing with he is ready to apologize and correct the mistakes he made in the past and make things right with everyone he wronged Travis shares how autism is not an excuse but a reason Travis was diagnosed with Schizophrenia in 2013 That diagnoses would give him many answers as to why he had been behaving the way he was It is hard to control your behaviors when you are hearing voices having hallucinations and experiencing delusions Travis was convinced that he had to pay women an autism bill in order to like them and get them to like him He became so desperate to pay what he thought was his autism bill that he began stealing money from his parents extended family and friends Travis was in a fight for his life to stay alive Fighting suicidal ideation for years Travis tried to get rich so he was able

to pay his autism bill and did not have to kill himself Travis opened a publishing business to try and help parents of children with autism share their stories with the world but ended up mishandling business money and having to file for bankruptcy with his business Travis ended up not being able to provide the services people paid him for because he used the money to pay people to hang out with him Travis is in the process of making things right with everyone who was wronged through his business and he is in the process of paying back his family and friends for all of the money he took from them Now that Travis has a full and complete picture of his mental health he knows that Schizophrenia is not an excuse for poor behavior but a possible reason for his irrational thinking and behaviors Travis feels relieved to learn that the majority of his problems are not likely autism related but more so related to schizophrenia With a comorbid diagnoses Travis hopes to apologize to everyone that he hurt by being selfish and stealing money to pay people to hang out with him If you or someone you know gave Travis money and feel that you did not receive the services you paid for Travis will encourage you to reach out to him in this book so he can make things right with you Read the book for instructions on how to contact Travis so that he can make things right with you This is an honest and caring book written by a guy who really cares about other people and wants to make a difference in the world The best thing you can do is learn from your mistakes and Travis feels like he has learned from his mistakes He is now ready to move forward with his life and help others understand autism and mental illness by sharing his stories and knowledge with the world

**Why Do Insurance Companies Want Autistic People to Die?** Travis Breeding, 2014-08-05 As a parent to a child with Autism you definitely face many challenges in advocating for your child's most basic human needs While those needs never go away sometimes the basic human needs change a little as the child grows up and becomes an adult I talk to many parents who are experiencing a tremendous amount of pain and sadness with raising their Autistic child It can be overwhelming at times to cope with the amount of anxiety and fear that is placed upon your life once your child receives an Autism diagnosis Parents often ask me what some of the underlying issues of Autism are that their child might face in the years to come as they become teenagers and adults While I try to remain optimistic and want to be encouraging to these parents it can be difficult to avoid telling them the reality of Autism as an adult While the reality is that this is just one person's story and experience with Autism as an Autistic adult I know many individuals who are adults with Autism and share similar experiences The reality is that with early intervention it is the goal your child will become an adult and be successful in social relationships It is possible that your child will be able to make friends and form relationships of all kinds with ease as they were able to access the appropriate help with social skills as a child This is a great goal but this is not always the case for every child with Autism With insurance companies denying important social interventions and many parents not being able to fund services for their child out of pocket there is a good chance that many Autistic children will grow to become adults without receiving the appropriate services to help them This being the case some of their social relationships can be difficult and your child may struggle to maintain friendships and relationships for
