Taking Aviation To New Heights:

Taking Aviation to New Heights Jacqueline Cardinal, Laurent Lapierre, 2013-11-19 A fascinating biography of Pierre Jeanniot the man who was at the helm of Air Canada IATA and the aviation industry. *Taking Aviation to New Heights* is a compelling case study of how a business man was born and went on to achieve financial success, social status and political sway.

Texas Takes Wing Barbara Ganson, 2014-01-01 A history of aviation in Texas that brilliantly demonstrates the evolution of flight technology as a harbinger of social change. Technology and Culture. In this book pilot and historian Barbara Ganson brings to life the colorful personalities that shaped the phenomenally successful development of the aviation industry in the Lone Star state. Weaving stories and profiles of aviators, designers, manufacturers and those in related services. *Texas Takes Wing* covers the major trends that propelled Texas to the forefront of the field. Covering institutions from San Antonio's Randolph Air Force Base, the West Point of this branch of service to Brownsville's airport with its Pan American Airlines instrument flight school which served as an international gateway to Latin America as early as the 1920s to Houston's Johnson Space Center, home of Mission Control for the US space program, the book provides an exhilarating timeline and engaging history of dozens of unsung pioneers as well as their more widely celebrated peers. Drawn from personal interviews as well as major archives and the collections of several commercial airlines including American, Southwest, Braniff, Pan American Airways and Continental, this sweeping history captures the story of powered flight in Texas since 1910. With its generally favorable flying weather, flat terrain and wide open spaces, Texas has more airports than any other state and is often considered one of America's most aviation friendly places. *Texas Takes Wing* also explores the men and women who made the region pivotal in military training, aircraft manufacturing during wartime, general aviation and air servicing of the agricultural industry. The result is a soaring history that will delight aviators and passengers alike. Includes photos.

The Report: Dubai 2014 Oxford Business Group, 2014-01-28 In many respects 2014 marked the transition from strong recovery to promising growth for Dubai. With many exciting projects in the pipeline, not least the hosting of Expo 2020, the emirate is continuing to build on its reputation as a dynamic and international centre for business. Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014 while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth with various projects including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, further cementing the emirate's status as a leading transport and logistics hub, not just regionally but globally too. The continued development of Dubai's retail and hospitality offerings alongside the upgrades to its airports should help to ensure robust growth in visitor numbers from both the region and further afield.
