Andrew Goldberg,Gerard Stansby,1999 As finals approach medical students often become overwhelmed by the sheer volume of knowledge required to pass all subjects in one go including surgery medicine obstetrics and gynaecology pharmacology and psychiatry Clearly the students cannot know each of these subjects in as much detail as they did during their individual attachments and they need to concentrate on important topics rather than minutiae Whereas existing textbooks cover many topics very well and in great detail they are lengthy and difficult to read in a short space of time also some subjects are poorly covered and give no real understanding of practical management and logical thought processes the exact requirements for passing finals Surgical Talk Surgery for Finals is specifically aimed at helping students pass the surgical final examination it concentrates on subjects and concepts that tend to confuse students Each chapter is like a tutorial providing tips on what to say and when to say it and more importantly a logical approach to answering questions The book deals with topics poorly covered elsewhere such as fluid balance total parenteral nutrition central lines drains and surgical antibiotics It also has comprehensive chapters on orthopaedics and urology The reader will feel as though they are being taught one to one

**Questions In Undergraduate Surgery** Gerard Stansby,Andrew J Goldberg Obe,2008-08-08 As the first in the Clinical Talk series the philosophy of this book is to have a set of question based sections to help a final year medical student prepare for exams These sections include multiple choice questions MCQs extended matching questions EMQs and case studies The idea is to have not just a test yourself book but one which students can work through as a learning exercise as well as for revision purposes For that reason the answers and explanations provided here are just as important as the questions themselves Stansby and Goldberg have structured this book such that it complements one of their bestselling textbooks Surgical Talk Revision in Surgery a
