Aliprandi, 2025-10-03. The artificial author explores the theme of intellectual property in the era of generative artificial intelligence and reflects on the new concept of creativity brought by this disruptive technology. The book questions the concept of authorship and the possibility that machines might perform much of the creative work traditionally reserved for humans, leaving the latter in the mere role of controller of the outputs obtained. Through an interesting doctrinal reflection, a precise commentary on jurisprudential cases, and a detailed survey of the terms of use of the main platforms, Simone Aliprandi offers an overview of the main emerging issues regarding copyright management of AI-generated works. The book is written in an accessible style and is intended not only for legal professionals but for all those interested in the new challenges posed by artificial intelligence in the field of creativity. The work is completed by a series of explanatory diagrams and an extensive bibliography.

Reader Bot Naomi S. Baron, 2026-01-20. What happens to human reading when AI bots can do it for us? Explosive developments in artificial intelligence have awed everyday users with the technology's ability to draw, do computer coding, and especially to write. Those AI-generated essays and poems, legal briefs, and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write: AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student, lawyer, or researcher might produce, AI doesn't read the way that humans do. Now that AI is proving an adept reader, what happens to our own reading skills and motivations, especially at a time when both voluntary and school reading are increasingly on the decline? We have learned that when we let chatbots write for us, there are pros and cons to handing over our virtual pens. It's critical that we also think through the consequences of relinquishing reading, a deeply human activity, to bots. What do we stand to gain and lose when we let AI read for us? Tracing the intersecting trajectories of AI and reading, *Reader Bot* tackles this vital question, revealing why we must be thoughtful about how we welcome AI as reader into our lives.

Reimagining Government Faisal Hoque, Erik Nelson, Thomas H. Davenport, 2026-01-06. How AI can help the government lead with speed, trust, and impact. Artificial Intelligence is reshaping what is possible across every sector, and public service is no exception. *Reimagining Government* is a bold, practical playbook for harnessing AI to deliver smarter, faster, and more effective outcomes. Inside, you'll find clear breakdowns of AI opportunities and challenges in the government space, proven frameworks and maturity models for responsible, scalable adoption, insights and examples from real-world government innovators, strategies to transform leadership culture and public impact. Written for policymakers, technologists, and civic leaders, this book is a guide to making AI work for people as well as for systems.
