GP Review ,2004 **Self-Help in Mental Health** T. Mark Harwood,Luciano L'Abate,2009-11-24 Self help is big business but alas not a scientific business The estimated 10 billion that is spent each year on self help in the United States is rarely guided by research or monitored by mental health professionals Instead marketing and metaphysics triumph The more outrageous the miraculous cure and the revolutionary secret the better the sales Of the 3 000 plus self help books published each year only a dozen contain controlled research documenting their effectiveness as stand alone self help Of the 20 000 plus psychological and relationship web sites available on the Internet only a couple hundred meet professional standards for accuracy and balance Most in fact sell a commercial product Pity the layperson or for that matter the practitioner trying to navigate the self help morass We are bombarded with thousands of potential resources and contradictory advice Should we seek wisdom in a self help book an online site a 12 step group an engaging autobiography a treatment manual an inspiring movie or distance writing Should we just do it or just say no Work toward change or accept what is Love your inner child or grow out of your Peter Pan I become confused and discouraged just contemplating the choices
