Killing the Competition Martin Daly,2017-07-05 Criminologists have known for decades that income inequality is the best predictor of the local homicide rate but why this is so has eluded them There is a simple compelling answer most homicides are the denouements of competitive interactions between men Relatively speaking where desired goods are distributed inequitably and competition for those goods is severe dangerous tactics of competition are appealing and a high homicide rate is just one of many unfortunate consequences Killing the Competition is about this relationship between economic inequality and lethal interpersonal violence Suggesting that economic inequality is a cause of social problems and violence elicits fierce opposition from inequality s beneficiaries Three main arguments have been presented by those who would acquit inequality of the charges against it that absolute poverty is the real problem and inequality is just an incidental correlate that primitive egalitarian societies have surprisingly high homicide rates and that inequality and homicide rates do not change in synchrony and are therefore mutually irrelevant With detailed but accessible data analyses and thorough reviews of relevant research Martin Daly dispels all three arguments Killing the Competition applies basic principles of behavioural biology to explain why killers are usually men not women and counters the view that attitudes and values prevailing in cultures of violence make change impossible *Clinical Anthology* Alex J. Hurder,1997

Language Myths and the History of English Richard J. Watts,2011-02-01 *Language Myths and the History of English* aims to deconstruct the myths that are traditionally reproduced as factual accounts of the historical development of English Using concepts and interpretive sensibilities developed in the field of sociolinguistics over the past 40 years Richard J Watts unearths these myths and exposes their ideological roots His goal is not to construct an alternative discourse but to offer alternative readings of the historical data Watts raises the question of what we mean by a linguistic ideology and whether any discourse a hegemonic discourse an alternative discourse or even a deconstructive discourse can ever be free of it The book argues that a naturalized discourse is always built on a foundation of myths which are all too easily taken as true accounts **Subordination** Katie Ashley,2015-12-17 When Sophie Jameson first became a domme at Club 1740 it was more out of financial necessity than it was for personal pleasure and sexual exploration But all along her path in life and her heart was with a different profession one she was planning to embark on at the summer s end And then he changed everything Tall dark impossibly built William was the complete oppostie of whatever image a male sub conjured up Page 4 of cover

Sephardim and Ashkenazim Sina Rauschenbach,2020-11-09 Sephardic and Ashkenazic Judaism have long been studied separately Yet scholars are becoming ever more aware of the need to merge them into a single field of Jewish Studies This volume opens new perspectives and bridges traditional gaps The authors are not simply contributing to their respective

fields of Sephardic or Ashkenazic Studies Rather they all include both Sephardic and Ashkenazic perspectives as they reflect on different aspects of encounters and reconsider traditional narratives Subjects range from medieval and early modern Sephardic and Ashkenazic constructions of identities influences and entanglements in the fields of religious art halakhah kabbalah messianism and charity to modern Ashkenazic Sephardism and Sephardic admiration for Ashkenazic culture For reasons of coherency the contributions all focus on European contexts between the fourteenth and the nineteenth centuries
