Hulu Today Returns:

Half a Decade of Linux-y Shenanigans Bryan Lunduke,2018-02-05 Every article written between 2012 and 2017 by Bryan Lunduke Originally published by Network World these articles represent a snapshot a sort of time capsule of the state of Linux Open Source and alternative Operating Systems during that half decade It was a crazy time covered by an equally crazy guy **Adventure** ,1922 **Post-TV** Michael Strangelove,2015-03-27 In the late 2000s television no longer referred to an object to be watched it had transformed into content to be streamed downloaded and shared Tens of millions of viewers have cut the cord abandoned cable television tuned into online services like Netflix Hulu and YouTube and also watch pirated movies and programmes at an unprecedented rate The idea that the Internet will devastate the television and film industry in the same way that it gutted the music industry no longer seems farfetched The television industry however remains driven by outmoded market based business models that ignore audience behaviour and preferences In Post TV Michael Strangelove explores the viewing habits and values of the post television generation one that finds new ways to exploit technology to find its entertainment for free rather than for a fee Challenging the notion that the audience is constrained by regulatory and industrial regimes Strangelove argues that cord cutting digital piracy increased competition and new modes of production and distribution are making audiences and content more difficult to control opening up the possibility of a freer more democratic media environment A follow up to the award winning Watching YouTube Post TV is a lively examination of the social and economic implications of a world where people can watch what they want when they want wherever they want
