Cybermedia Carol Vernallis, Holly Rogers, Jonathan Leal, Selmin Kara, 2021-10-21 We're experiencing a time when digital technologies and advances in artificial intelligence robotics and big data are redefining what it means to be human. How do these advancements affect contemporary media and music? This collection traces how media with a focus on sound and image engages with these new technologies. It bridges the gap between science and the humanities by pairing humanists' close readings of contemporary media with scientists' discussions of the science and math that inform them. This text includes contributions by established and emerging scholars performing across the aisle research on new technologies exploring topics such as facial and gait recognition, EEG and audiovisual materials surveillance and sound and images in relation to questions of sexual identity, race, ethnicity, disability, and class, and includes examples from a range of films and TV shows including *Blade Runner*, *Black Mirror*, *Mr. Robot*, *Morgan*, *Ex Machina*, and *Westworld*. Through a variety of critical, theoretical, proprioceptive, and speculative lenses, the collection facilitates interdisciplinary thinking and collaboration and provides readers with ways of responding to these new technologies.

Strategic Communication Research in the Age of AI
Young Joon Lim, 2024-10-14 This comprehensive integrated research methods guide equips students and researchers to conduct effective studies in the evolving field of strategic communication. The book covers the entire research process from formulating research questions to analyzing data and presenting findings with a particular focus on navigating the complexities of AI and social media integration. While numbers and statistics can be daunting to students, integrating statistical methods with traditional approaches allows for more robust research projects and impactful findings. Augmenting quantitative and qualitative methods with the latest digital tools and resources, *Strategic Communication Research in the Age of AI* is an accessible guide to researching traditional and social media, public relations, advertising, and marketing communication. Features: Comprehensive Coverage: The book addresses all essential elements of strategic communication research, including research design, methodologies, quantitative and qualitative experimental content analysis, data collection, and analysis, including AI tools, statistical analysis, descriptive and inferential, and ethical considerations. Focus on AI and Social Media: It emphasizes the growing role of AI and social media in communication research, providing practical guidance on leveraging these tools for research tasks like data collection, sampling, analysis, and presentation. Student-Friendly Approach: The book is designed for students with clear explanations, step-by-step examples, chapter summaries, and key questions to reinforce understanding. It incorporates real-world scenarios and case studies to illustrate research concepts in action. Strong Foundation in Statistics: Dedicated chapters introduce both descriptive and inferential statistics, explaining key concepts and formulas relevant to strategic communication research. Focus on Writing and Presentation: The book provides clear guidelines for writing research papers in APA style, including structure, citation techniques, and best practices for presenting research findings. It highlights the importance of clear communication and effective presentation in the digital age.

Remembering the Future through Cinematic Symbols Amar Singh, 2024-12-15 This book explores the making of futuristic memory through cinematic symbols relating to future relationships between humans and artificial intelligence. Amar Singh examines how audiences are being prepared for possible future scenarios where they may find themselves entangled with intelligent objects through developing relationships with them and if so how they might react when confronted by an intelligent species. Through this research, Singh focuses on both the complications and flaws of science fiction depictions of AI as well as more abstract works that while not directly connected, contribute to a better understanding of these emerging technologies. Scholars of film, media, memory, posthuman, transhuman, and cultural studies will find particular value in this book, along with those focusing on literary and critical theory, arts and aesthetics, political sociology, and advanced research in AI.

Two Eagles Ricardo Sheffield, 2023-04-19 In the middle of the Sonoran Desert, two eagles meet face to face. One has flown from the north, the other from the south. After a long journey, they confront each other in a vast territory that unites two great countries that, like the eagles, are not as different as they seem. Two hundred years after the beginning of diplomatic relations between Mexico and the United States, Ricardo Sheffield takes a look at the shared history of both nations. He considers questions such as: What was life like for the Native Americans? When did some decide to follow an unknown path south, leaving others to stay behind? What unites the lives of Mexicans with those living in the United States of America? What have been the moments of greatest tension between the two countries? With a distinctive voice full of irony, humor, and popular sayings, the author traces the history of these two great powers from their common beginnings with the Clovis culture, hunting mammoths, to the civil wars of both countries, the promulgation of their respective constitutions, and their struggles to abolish slavery.
