### **Thinking And Deciding 4th Edition:**

**Thinking and Deciding** Jonathan Baron, 2000-12-28 Thinking and Deciding has established itself as a required text and important reference work for students and scholars of human cognition and rationality. In this the third edition Jonathan Baron delves further into many of the key questions addressed in the previous editions. For example, how should we think? What if anything keeps us from thinking that way? How can we improve our thinking and decision making? Baron has also revised or expanded his treatment of topics such as risk, utilitarianism, Bayes's theorem, moral thinking, trust, utility measurement, and decision analysis and values. By emphasizing decision making, Baron has made Thinking and Deciding Third Edition more relevant to researchers in applied fields such as medicine, business, public policy, and law, while maintaining its appeal to graduate and undergraduate students.

*Cognitive Sophistication and the Development of Judgment and Decision-Making* Maggie E. Toplak, 2021-10-27 Cognitive Sophistication and the Development of Judgment and Decision Making reviews the existing literature on the development of reasoning, judgment, and decision making with a primary focus on measures from the heuristics and biases tradition. The book presents a model based on cognitive sophistication to examine the development of judgment and decision making, including age-related differences in developmental samples, associations with intellectual abilities and executive functions, and associations with dispositional tendencies that support judgment and decision making. Additional sections cover the empirical findings of a longitudinal study conducted over seven years that tie together the discussed aspects related to cognitive sophistication. This book will provide a much-needed description of the theoretical and conceptual issues, a review of empirical findings, and an integrative summary of the implications for developmental models of reasoning, judgment, and decision making. Explores whether individual heuristics and biases are associated. Reviews individual differences in cognitive abilities and thinking dispositions. Examines reasoning from the lens of cognitive sophistication. Discusses the implications for models, including dual process models. Tests and elaborates using empirical findings from a longitudinal study.
