Thinking Architecture Edition Peter Zumthor:

Thinking Architecture Peter Zumthor, 1998 Featuring four essays by Peter Zumthor this volume exhibits the essence of Zumthor's architectural ideas **Thinking Architecture** Peter Zumthor, 2006 The Pritzker winning architect offers insight into what motivates his design process explaining how he creates environments that appeal to a visitor's heart and mind in different ways while instilling a sense of presence in a third edition that has two additional essays including Architecture and Landscape and The Leis Houses

Thinking Architecture Peter Zumthor, 1999-01-01 In order to design a building with a sensuous connection to life one must think in a way that goes far beyond form and construction In these essays Peter Zumthor expresses his motivation in designing buildings which speak to our emotions and understanding in so many ways and possess a powerful and unmistakable presence and personality This book whose first edition has been out of print for years has been expanded to include three new essays Does Beauty Have a Form The Magic of the Real and Light in the Landscape It has been freshly illustrated throughout with new color photographs of Zumthor's new home and studio in Haldenstein taken specially for this edition by Laura Padgett and received a new typography by Hannele Grönlund

Architects Today Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings

Materials and Meaning in Architecture Nathaniel Coleman, 2020-02-20 Interweaving architecture philosophy and cultural history *Materials and Meaning in Architecture* develops a rich and multi dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad ranging study shows how the most engaging built works are as tactile as they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect's work to consider the enduring expressive possibilities of material use in architecture The book's chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers *Materials and Meaning in Architecture* will cause theorists to rethink their assumptions and designers to see new potential for their projects *The Environmental Imagination* Dean Hawkes, 2008 This volume presents a chronologically

ordered and detailed account of the developing relationship between technics and poetics in environmental design in architecture through a consideration of the work of major names in the field

Precedented Environmental Futures Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment

Beyond Environmental Comfort Boon Lay Ong, 2013-06-26 Beyond Environmental Comfort highlights some of the key ideas that form the foundation of the field of environmental comfort and at the same time gives voice to some of the concerns and considerations on the limitations of the field as it stands today Bringing together a range of foremost thinkers in their respective fields Michel Cabanac Derek Clements Croome Nick Baker Harold Marshall Juhani Pallasmaa Dean Hawkes and Constance Classen this book argues for a deeper appreciation of how environmental comfort may be understood in terms of our relationship with the environment rather than as independent qualities For the first time these diverse views are brought together by Editor Boon Lay Ong to present insights into a world beyond what is normally covered in academic research In the process an attempt is made to define the field for the future This book shows that it is by understanding just how environmental design needs to go beyond mere comfort and deal with well being that we can meaningfully design our future

The Architects' Journal, 2006-10

Materials, Form and Architecture Richard Weston, 2003 After a century largely dominated by discussions of space and form there is now renewed interest in the material aspects of architecture Backlashing against the digital and virtual wave there is a fresh emphasis on the material qualities of buildings while ironically it is the information technologies that allow the architect direct control over what happens on the building site once more The early chapters of the book survey the field historically and explore the theory of materials and form These are followed by seven thematic chapters and a well illustrated discussion of the future of materials with examples chosen from contemporary architecture The book aims to excite students and architects to take more interest in this often neglected aspect of architecture It counters the tendency to think of materials as a technical issue by addressing the subject historically and critically linking cultural ideas to technical means

The New Modern House Jonathan Bell, Ellie Stathaki, 2010-10-06 Modern architecture is a story of movements styles and genres But what of the work that remains defiantly unique refusing to submit to a label or genre This book looks at the emerging trend of architecture that favours substance over style combining functional design and sustainable processes with a straightforward honest aesthetic

Ai Weiwei, Spatial Matters Weiwei Ai, Anthony Pins, 2014 This book draws on the full breadth of Ai Weiwei's architectural installation and activist work including drawings and plans from huge range of international projects with particular

emphasis on his use of space Throughout the book a wide selection of essays by leading critics and art historians as well as interviews with the artist draw out his central concerns Jacket Die Bedeutung der Idee in der Architektur von Valerio Olgiati Markus Breitschmid, 2008 Valerio Olgiati is known as one of the most important exponents of Swiss contemporary architecture In the present forth volume of the series edition archithese Olgiati answers questions posed to him about the social responsibility of the architect the **The Publishers Weekly**, 2006 **Crafting Modularity** Eric Robert Jacoby, 2002 Scroope, 2005 Le Moniteur architecture, 1998 *Bodies, Performance, Post-identity* Nicola Probst, 1999 Dimensions, 2001 Dimensions is the annual student produced journal of architecture at the University of Michigan It seeks to contribute to the critical discourse of architectural education by documenting the most compelling work produced by its students faculty fellows and visiting lecturers *Oz*, 2009
