research project which examined the development and use of reading and writing by school aged children The studies  
examined the relationships between children s reading and writing by looking at the social contexts that surrounded their  
understandings and uses of reading and writing the cognitive processes that the readers and writers invoked in completing  
different kinds of tasks and the products that were produced including the ideas that were developed in reading and writing  
and the ways in which these ideas were structured in presentation or recall The results point to new understandings about  
children s context for literacy and ways in which children at distinctly different phases of their schooling experiences  
approach reading and writing The author contrasts ways in which children at each of the differing ages approach their  
reading and writing tasks illuminating the knowledge they already have and what they have yet to learn     **Writing**
