This is the first step. Featuring new and updated information and studies including an introduction by actress Claudia Christian the second edition of *The Cure for Alcoholism* delivers exactly what millions of alcoholics and families of alcoholics have been hoping for a painless dignified and medically proven cure for their addiction. Backed by 82 clinical trials and research that extends back to 1964. The Sinclair Method deploys an opiate blocking medication in a very specific way in combination with ongoing drinking to extinguish the addictive software in the brain. The de-addiction process rolls back the addictive mechanism in the brain to its original pre-addicted state before the first drink was consumed making this program an actual cure for alcoholism. Drs Roy Eskapa and David Sinclair of The Sinclair Method have put together a sound scientific book that proves that with this particular method alcoholism can be cured in more than 78 percent of patients. What's more the treatment avoids the dangerous withdrawal symptoms allowing patients to detox gradually and safely while they are still drinking. This removes the need for expensive and unpleasant inpatient rehabilitation programs. Actual drinking levels and cravings automatically decrease until control over alcohol is restored. The bottom line is that patients can control their drinking or stop altogether with the simple yet powerful process outlined in *The Cure for Alcoholism*. Including a new introduction by actress Claudia Christian about The Sinclair Method's impact on her life updated trial information and a letter explaining the treatment that can be given to doctors by patients. *The Cure for Alcoholism* is a revolutionary book for anyone who wants to gain control over drinking. *Dying for a Drink* Anderson Spickard, Barbara R. Thompson, 1985. Through a series of vivid case histories and no nonsense factual information this book suggests a comprehensive practical recovery program based on time tested tools and principles. It is an invaluable resource providing both the clinical information and the Christian perspective so vital in dealing with this growing issue. **Alcoholism** Ronald Marshall, 2001. Despite the plethora of books on alcohol abuse and alcoholism *Alcoholism Genetic Culpability or Social Irresponsibility* is unique. It departs from a generic version of alcoholism it examines the concepts rationale and research findings of all the various aspects of alcoholism and places them into two camps namely the genetic and the social. Then Marshall's book deals specifically with the issue of social irresponsibility as a central feature in alcohol abuse. Social irresponsibility carries implications for the individual as well as governments policies. This book will be useful for academics and professionals who are concerned about the widespread problem of alcoholism. Health professional social workers and legislators will find this book invaluable in uncovering the nature of this phenomenon. **Alcohol Abuse and Addiction** National Institute on Alcohol Abuse and Alcoholism (U.S.), United States.
