*Spaceship Earth in the Environmental Age, 1960–1990* Sabine Höhler,2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War H hler s study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades

environmental crisis examines how the planet Earth fits into the wider universe and explores human environment interactions *Life in the Market Ecosystem* Stuart K. Hayashi, 2014-11-13 *Life in the Market Ecosystem* the second book in the Nature of Liberty trilogy confronts evolutionary psychology head on. It describes the evolutionary psychologists theory of gene culture co evolution which states that although customs and culture are not predetermined by anyone's genetic makeup one's practice of a custom can influence the likelihood of that person having children and grandchildren. Therefore according to the theory customs count as evolutionary adaptations. Extending that theory further as entire systems of political economy capitalism socialism and hunter gatherer subsistence consist of multiple customs and institutions it follows that an entire political economic system can likewise be classified as an evolutionary adaptation. Considering that liberal republican capitalism has insofar as the system has been implemented done more to reduce the mortality rate and secure human fertility than other models of societal structure it stands to reason that liberal republican capitalism is itself a beneficent evolutionary adaptation. Moreover as essential tenets of Rand's Objectivism individualism observation based rationality and peaceable self interest have been integral to the development of the capitalist ecosystem important aspects of the Objectivism are worthwhile adaptations as well. This book shall uphold that position as well as combat critiques by evolutionary psychologists and environmentalists who denounce capitalism as self destructive. Instead capitalism is the most sustainable and fairest political model. This book argues that of all the philosophies Objectivism is the one that is most fit for humanity **A**
