**Supernova Era** Cixin Liu, 2019-10-22

From science fiction legend Cixin Liu the New York Times bestselling and award winning author of The Three Body Problem comes a vision of the future that reads like Ursula K Le Guin rewriting The Lord of the Flies for the quantum age. NPR In those days Earth was a planet in space. In those days Beijing was a city on Earth. On this night history as known to humanity came to an end. Eight light years away a star has died creating a supernova event that showers Earth in deadly levels of radiation. Within a year everyone over the age of thirteen will die. And so the countdown begins. Parents apprentice their children and try to pass on the knowledge needed to keep the world running. But when the world is theirs the last generation may not want to continue the legacy left to them. And in shaping the future however they want will the children usher in an era of bright beginnings or final mistakes. This audacious and ultimately optimistic early work will give Liu's English reading fans a glimpse at his evolution as a writer and give any speculative fiction reader food for deep thought.
