**Guide to Writing Empirical Papers, Theses, and Dissertations** G. David Garson, 2001-11-21 Describes the quantitative research process framing analytical questions developing a comprehensive outline providing a roadmap for the reader and accessing indispensable computer and program tools Supplies end of chapter checklists extensive examples and bibliographies

*The Art of Co-Creation* Bryan R. Rill, Matti M. Hämäläinen, 2018-08-20 This book illustrates how to design and implement co creation a powerful form of collective creativity that harnesses the potential of teams and can generate breakthrough insights Skilled leaders and facilitators can utilize this approach to unleash the creative potential of their organizations Drawing from years of applied research the

authors bring together insights from the fields of design and organizational development into an evocative and pragmatic how to guidebook Taking a human centred rather than process oriented perspective the book argues that experience design separates true co creation from other forms of collective efforts and design thinking Collective moments of creative insight emerge from the space between an experience of flow and synchronicity from which new ideas spring forth How to create and hold this space is the secret to the art of co creation Collective breakthroughs require stakeholders to undergo a journey from the world of their existing expertise into spaces of new potential It requires leaders moving from a position of dominating space to holding the space for others and developing core capacities such as empathy and awareness so that teams can engage each other co creatively This book uncovers the secrets of this journey enabling process designers to develop more effective programs

*Keeping Up with Emerging Technologies* Nicole Hennig, 2017-06-21 The acceleration of technological change demands that today s information professionals and educators not only be constantly acquiring new knowledge and skills but also that they cultivate the ability to make sound judgments on which technologies to embrace Today s librarians and information specialists know it s imperative that they keep up with new technologies But not all technologies are equally important either within the library setting or to library patrons So how does one decide which ones to pursue and integrate into services In the uphill battle to stay current with new and emerging technologies deciding which ones to pursue and integrate into services is a major challenge A secondary problem is simply finding the time to consider the question Readers of *Keeping Up with Emerging Technologies* will learn all of the best practices and skills to keep up with new technologies and to analyze the ability of specific technologies to meet recognized user needs all in this single source You ll learn the best ways to gather information about new technologies and user needs to evaluate and analyze information to curate technology information for others to set up experiments and evaluate the results and to present your findings to persuade decision makers Written by the former head of user experience at MIT s library system this guidebook serves information professionals educators education technology specialists and anyone with emerging technology or innovation in their job titles It will also be useful for library administrators and those who manage these positions as well as for students seeking a technology oriented or curriculum design career path in libraries

*Cracking Creativity* Michael Michalko, 2001-06-26 From the bestselling author of *Thinkertoys* this follow up brings innovative creative thinking techniques within reach giving you the tools to tackle everyday challenges in new ways Internationally renowned business creativity expert Michael Michalko will show you how creative people think and how to put their secrets to work for you in business and in your personal life You don t have to be a genius to solve problems like one Michalko researched and analyzed hundreds of history s greatest thinkers across disciplines from Leonardo da Vinci to Pablo Picasso to bring the best of their techniques together and to teach you how to apply them in your own life *Cracking Creativity* is filled with exercises and anecdotes that will soon have you looking at problems and seeing many different solutions
