**Private Law in the External Relations of the EU** Marise Cremona, Hans-W Micklitz, 2016-03-17 Private Law in the External Relations of the EU is an innovative study of the interactions between EU external relations law and private law two unrelated fields of law inverted if private law is understood as regulatory private law the space where regulatory law intersects with private economic activity Here the link between the Internal Market and the global market and thereby international law is much more prominent In this book key questions about the relationship between EU external relations law and private law are answered including in what ways might European private law act as a tool to achieve EU external policy objectives particularly in regulatory fields How might the quickly developing EU external competence over the procedural dimensions of private law including private international law impact on substantive law both externally and internally And how is the legal position of private parties affected by EU external relations In asking these questions this edited collection opens up a field of enquiry into the so far underexplored relationship between these two fields of law In doing so it addresses three different aspects of the relationship i the evolution of the EU competence ii the ways in which EU private law extends its reach beyond the boundaries of the internal market and iii the ways in which the EU contributes to the formation of private regulation at the international level

*L'intégration du droit international et communautaire dans l'ordre juridique national* Pierre Michel Eisemann, 2023-09-14 Just how International and European Community Law is being integrated into domestic legal systems is as yet not too well known To gain a clear overview of this grey area requires more than knowing about the various constitutional rules What is also needed is a study of little known administrative practices and the attitudes of the national courts where case law is often as complex as it is diverse When all these elements are taken into account the general picture that emerges is a much more subtle one transcending the classical positions based on the theories of monism and dualism To grasp this reality and go beyond preconceived ideas it seemed indispensable to make a thorough analysis of national practices To this end the International Law Centre of the University of Paris XIII Cedin Paris XIII took the initiative in 1990 of setting up a network of European international lawyers to work on the theme International norms and legal barriers This book presents the outcome of the network s programme The research was organized on the basis of a single questionnaire which provided the outline of a common workplan to which each of the contributors has adhered Detailed comparisons of national practices can now be made relating in particular to international treaties acts of international organisations and of the European Communities and to unwritten international law This is the first time that such a comprehensive and detailed survey has been made of all thirteen countries Reading the national reports one after the other provides complete information on domestic practices reading them crosswise gives a direct comparison between the different countries on specific issues

Droit International Privé À la Fin Du XXe Siècle Symeon Symeonides, 2000 This book provides a comparative assessment of the current state of private international law by exploring the fundamental

philosophical ideological and methodological challenges encountered during the 20th century and the responses to those challenges in the western world Among the questions discussed are the dilemma between conflicts justice and material justice the conflict between the goal of international uniformity and the need or desire to protect state or national interests the tension between the goals of certainty and flexibility the symbiosis of the multilateral unilateral and substantive methodologies and the antagonism or co existence between choice of law rules and flexible approaches and between jurisdiction selecting and content oriented rules or approaches Written by some of the world s most distinguished scholars this thought provoking book provides insightful and diverse perspectives from nineteen countries It is essential reading for any teacher or student of private international law or comparative law **Journal du droit international** Edouard Clunet,André Henri Alfred Prudhomme,1905 Vols 6 29 and 32 53 include section Bibliographie syst matique de droit international varies slightly for 1878 1902 and 1905 26 *Accountability of Peace Support Operations* M.C.

Zwanenburg,2005-05-01 Quis custodiet ipsos custodies In other words who guards the guardians At a time when the mandate of many peace support operations includes halting violations of international humanitarian law by third parties there is still a lack of clarity concerning accountability of peace support operations themselves This book addresses that accountability focusing on peace support operations under the command and control of the United Nations and the North Atlantic Treaty Organization It is concerned with the accountability of international organizations as well as troops contributing and member states but not of individuals Drawing on existing and emerging doctrines of international law including the law of state responsibility the law of responsibility of international organizations international institutional law and international humanitarian law and on the basis of state practice this book makes a strong plea for improving mechanisms to implement the accountability of peace support operations under international humanitarian law The Paul Reuter Prize 2006 was awarded to Marten Zwanenburg for this book

**La représentation institutionnelle dans l'ordre international** Evelyne Lagrange,2021-10-18 L institutionnalisation et l organisation d un ordre juridique sur un mode représentatif impliquent un processus de différenciation fonctionnelle entre représentants et représentants permettant la réduction de la multiplicité l'unité La personne morale apparaît comme le terme réunificateur de tout système représentatif Dans l'ordre international ce processus est perturbé par la présence dans les organes intergouvernementaux de représentants d'Etat qui sont autant d'organes des Etats membres présente prolongé par le consentement aux actes adoptés en leur sein Quel en est donc le sujet d'imputation l'organisation ou ses membres Une théorie de l'acte doit être développée au cœur de la théorie de l'organe pour démontrer que l'organisation internationale est la personnification juridique d'une collectivité d'Etats dotée d'un système représentatif et non que cela La qualité de partie un trait constitutif et de membre d'une organisation internationale ne prive l'Etat d'aucun des attributs de la souveraineté dans l'ordre international Au contraire la faculté d'investir un sujet de droit de compétences nouvelles est précisément un attribut de la souveraineté l'organisation est tout entière une création des Etats
