Sectional View of Engine Assembly

### ENGINE IDENTIFICATION

The Engine Code is located on a tag which is attached to the right bank cylinder head cover (Fig. 1).

The letter contained in the code identifies the engine by cubic inch displacement, carburetor type and compression ratio.

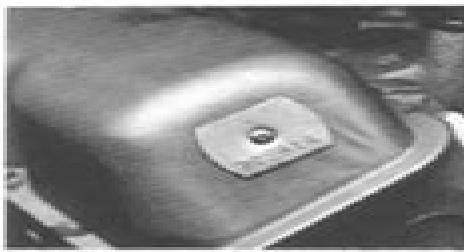

FIGURE 1 — Engine Code Location

The letters are coded as follows:

| Code | CID | Carb. | Comp. Ratio |
|------|-----|-------|-------------|
| H    | 304 | 2V    | 8.4:1       |
| N    | 360 | 2V    | 8.5:1       |

To further identify the engine by external inspection, the cubic inch displacement is cast into the cylinder block on both banks between the first and second core plug location.

Engines built for sale in California are painted red, all others are painted blue.

In the machining of cylinder blocks and crankshafts, it is sometimes necessary to machine the cylinder bores to .010" oversize, and the crankshaft main bearing journals or connecting rod journals to .010" undersize. These engines have a code stamped adjacent to the Engine Code on the tag attached to the right bank cylinder head cover. A single or two letter code is used.
