## Code Name Rules

- Code names must begin with a letter.
- Subsequent characters should only be letters, numbers, or underscore characters.
- Good practice makes names shorter than 25 characters and underscores, underscores, for spaces.
- Avoid names that are the same as well-known names in Excel or other Office applications.

## VBA Editor Tips

- The Project Explorer pane is best used to navigate between code windows.
- Use the code window's **Procedure** drop list (see **Navigating Code Window Lists**) to navigate between subroutines in a long code window.
- Click the **Project Explorer** button (see **Opening or Creating Code Windows**) at the top of the pane to toggle between a grouped list (folders) and a single list. Making this change in any one Office application will affect all Office applications.
- To maximize the code window, close all other windows and panes.
- To directly edit a macro in Excel or Word, press **Alt+F11**, select the macro name, then **Ctrl+D**.
- Press **Alt+F11** to close the VBA Editor and return to the Office application.

## Using Code Window Lists

Object	Procedure List
Worksheet	Worksheet
Workbook	Workbook

The **Object** and **Procedure** drop lists at the top of any code window. They can be used to navigate between subroutines or macro events triggered code.

1. Select an appropriate item from the **Object** drop list.
2. Then select an appropriate item from the **Procedure** drop list.

You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
