*Skepticism 101*, 2013      The Intelligence Trap David Robson, 2019-08-06 A startling provocative and potentially useful James McConnachie Times UK examination of the stupid things intelligent people do The Intelligence Trap explores cutting edge ideas in our understanding of intelligence and expertise including motivated reasoning meta forgetfulness and functional stupidity David Robson reveals the surprising ways that even the brightest minds and most talented organizations can go wrong from some of Thomas Edison's worst ideas to failures at NASA while offering practical advice to avoid mistakes based on the timeless lessons of Benjamin Franklin Richard Feynman and Daniel Kahneman      **Conspiracy** Michael Shermer, 2022-10-25 A well written and essential tool for those navigating today's complicated geopolitical landscape Library Journal Best selling author Michael Shermer presents an overarching theory of conspiracy theories who believes them and why which ones are real and what we should do about them Nothing happens by accident everything is connected and there are no coincidences that is the essence of conspiratorial thinking Long a fringe part of the American political landscape conspiracy theories are now mainstream 147 members of Congress voted in favor of objections to the 2020 presidential election based on an unproven theory about a rigged electoral process promoted by the mysterious group QAnon But this is only the latest example in a long history of ideas that include the satanic panics of the 1980s the New World Order and Vatican conspiracy theories fears about fluoridated water speculations about President John F Kennedy's assassination and the notions that the Sandy Hook massacre was a false flag operation and 9 11 was an inside job In *Conspiracy* Michael Shermer presents an overarching review of conspiracy theories who believes them and why which ones are real and what we should do about them Trust in conspiracy theories he writes cuts across gender age race income education level occupational status and even political affiliation One reason that people believe these conspiracies Shermer argues is that enough of them are real that we should be constructively conspiratorial elections have been rigged LBJ's 1948 Senate race medical professionals have intentionally harmed patients in their care Tuskegee your government does lie to you Watergate Iran Contra and Afghanistan and tragically some adults do conspire to sexually abuse children But Shermer reveals that other factors are also in play anxiety and a sense of loss of control play a role in conspiratorial cognition patterns as do certain personality traits This engaging book will be an important read for anyone concerned about the future direction of American politics as well as anyone whose watched friends or family fall into patterns of conspiratorial thinking      *Think Straight* Jon Guy, 2022-10-31 Put simply *Think Straight* is an owner's manual for the human brain Drawing from the vast history of scientific and cognitive research this book is a tour de force through the science and philosophy of the human mind and what it means to think as a rational human being in the 21st century Our world is awash in mis and disinformation baseless conspiracy theories New Age ideology anti science propaganda and all manner of magical thinking Pseudo experts fill the airwaves with false and bogus claims news media twist and spin information to suit their ends celebrities and corporations

push evidence free beliefs on their followers and politicians continue to mislead the masses with false promises and bad thinking In careful detail author Jon Guy investigates the art of thinking critically offering readers the ability to empower themselves and our society at large In order to think critically we must also learn what it means to know what knowledge is how to investigate how to question and how everything from computer algorithms written by geniuses to psychological traits embedded in us from our evolutionary origins conspire to construct a model of reality that we have much reason to doubt The human mind is not only the most powerful and complex structure ever discovered it is also riddled with a host of flaws shortcomings errors and limitations most of which none of us are ever made aware of Critical thinking is the ability to both capitalize on the strengths and power of human cognition as well as understand and combat the error prone nature of our brains Think Straight encourages us to accept that not everything we think is true and explores how we can compensate for the many errors of our minds Backed by the best available research and data and written in clear and decisive language Think Straight provides readers with the proper guidance and tools to improve your thinking inform your decisions avoid fraud and deceit and make the world a better place to live and prosper *Biomythology* David Cook,2016-04-28 Is the life unexamined by the fMRI not worth living Can biology replace the humanities in capturing what it means to be human Biomythology levels the playing field of skepticism doing for Darwin and science what Richard Dawkins has attempted for God and religion This irreverent romp reasons Once upon a time there were nine planetsscientific truth rests on the faith that future discoveries will not turn today s facts into tomorrow s fairytales Science is the art of arranging observations to fit theory When applied to alter minds rather than matter the evidence can be as convincing as a serial killer s smile on your first date With prenatal testing building better bell curves by controlling the gateway to our brave new world eugenics is thriving Biomythology will teach the skeptic to recognize over twenty rhetorical devices of scientific persuasion that can be borrowed to change our worldviews rather than the world we view How to Think Like a Social Scientist Thomas F. Pettigrew,1996 With examples drawn from throughout the behavioral sciences How to Think Like a Social Scientist fosters careful critical thinking about psychology and the social sciences Throughout the text Pettigrew encourages readers to apply newly developed critical thinking skills to the nature of theory comparisons and control cause and change sampling and selection varying levels of analysis and systems thinking in the social sciences **The Western Christian Advocate** ,1907 **MBA Jungle** ,2005 **Harper's Bazaar** ,1962 *Controlling Life* Philip J.
