Wired Tv Laboring Over An Interactive Future:

Wired TV Denise Mann, 2014-02-11 This collection looks at the post network television industry's heady experiments with new forms of interactive storytelling or wired TV that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular participatory Web 2.0 companies like Facebook YouTube and Twitter Contributors address a wide range of issues from the networks sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational corporate conglomeration on entrepreneurial creativity With essays from such top scholars as Henry Jenkins John T Caldwell and Jonathan Gray and from new and exciting voices emerging in this field Wired TV elucidates the myriad new digital threats and the equal number of digital opportunities that have become part and parcel of today's post network era Readers will quickly recognize the familiar television franchises on which the contributors focus including Lost The Office Entourage Battlestar Gallactica The L Word and Heroes in order to reveal their impact on an industry in transition While it is not easy for vast bureaucracies to change course executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities by incorporating social media members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era members of the Madison Avenue advertising community who were eager to rethink ad supported content and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series In the aftermath of the lengthy Writers Guild of America strike of 2007-2008 the networks clamped down on such collaborations and began to reclaim control over their operations locking themselves back into an aging system of interconnected bureaucracies entrenched hierarchies and traditional partners from the past What's next for the future of the television industry Stay tuned or at least online Contributors Vincent Brook Will Brooker John T Caldwell M J Clarke Jonathan Gray Henry Jenkins Derek Johnson Robert V Kozinets Denise Mann Katynka Z Mart nez and Julie Levin Russo **Transmedia Storytelling and the Apocalypse** Stephen Joyce, 2018-08-21 This book confronts the question of why our culture is so fascinated by the apocalypse It ultimately argues that while many see the post apocalyptic genre as reflective of contemporary fears it has actually co evolved with the transformations in our mediascape to become a perfect vehicle for transmedia storytelling The post apocalyptic offers audiences a portal to a fantasy world that is at once strange and familiar offers a high degree of internal consistency and completeness and allows for a diversity of stories by different creative teams in the same story world With case studies of franchises such as The Walking Dead and The Terminator Transmedia Storytelling and the Apocalypse offers analyses of how shifts in media industries and reception cultures have promoted a new kind of open world building narrative across film television video games and print For transmedia scholars and fans of the

genre this book shows how the end of the world is really just the beginning *Arrow and Superhero Television* James F. Iaccino, Cory Barker, Myc Wiatrowski, 2017-10-12 This collection of new essays focuses on The CW network's hit television series *Arrow* based on DC Comics' Green Arrow and its spin-offs *The Flash*, DC's *Legends of Tomorrow* and *Supergirl*. Comic book adaptations have been big business for film studios since *Superman* (1978) and in recent years have dominated at the box office: five of the 11 highest-grossing films of 2016 were adapted from comics. Superheroes have battled across the small screen for considerably longer, beginning with *The Adventures of Superman* (1952-1958) though with mixed results. The contributors explore the reasons behind *Arrow*'s success, its representation of bodies, its portrayal of women, its shifting political ideologies, and audience reception and influence on storylines.

#WWE Dru Jeffries, 2019-12-01 The millions of fans who watch World Wrestling Entertainment (WWE) programs each year are well aware of their role in building the narrative of the sport. *WWE Professional Wrestling in the Digital Age* explores the intersections between media technology and fandom in WWE's contemporary programming and business practices. In the Reality Era of WWE (2011 to the present), wrestling narratives have increasingly drawn on real-life personalities and events that stretch beyond the story world created and maintained by WWE. At the same time, the internet and fandom have a greater influence on the company than ever before. By examining various sites of struggle and negotiation between WWE executives and in-ring performers, between the product and its fans, and between the company and the rest of the wrestling industry, the contributors to this volume highlight the role of various media platforms in shaping and disseminating WWE narratives. Treating the company and its product not merely as sports entertainment but also as a brand, an employer, a company, a content producer, and an object of fandom, *WWE* conceptualizes the evolution of professional wrestling's most successful company in the digital era.

The Rise of Transtexts Benjamin W.L. Derhy, Kurtz, Mélanie Bourdaa, 2016-08-25 This volume builds on previous notions of transmedia practices to develop the concept of transtexts in order to account for both the industrial and user-generated contributions to the cross-media expansion of a story universe. On the one hand, there exists industrial transmedia texts produced by supposedly authoritative authors or entities and directed to active audiences in the aim of fostering engagement. On the other hand, there are fan-produced transmedia texts primarily intended for fellow members of the fan communities, with the Internet allowing for connections and collaboration between fans. Through both case studies and more general analyses of audience participation and reception, employing the artistic, marketing, textual, industrial, cultural, social, geographical, technological, historical, financial, and legal perspectives, this multidisciplinary collection aims to expand our understanding of both transmedia storytelling and fan-produced transmedia texts.

Social TV Cory Barker, 2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment Media Industries. On March 15, 2011, Donald Trump changed television forever. *The Comedy Central Roast of Trump* was the first major live broadcast to place a hashtag in the corner of the screen to encourage real-time reactions on Twitter, generating more than 25

000 tweets and making the broadcast the most watched Roast in Comedy Central history The trumproast initiative personified the media and tech industries utopian vision for a multi screen and communal live TV experience In Social TV Multi Screen Content and Ephemeral Culture author Cory Barker reveals how the US television industry promised but failed to deliver a social media revolution in the 2010s to combat the imminent threat of on demand streaming video Barker examines the rise and fall of Social TV across press coverage corporate documents and an array of digital ephemera He demonstrates that despite the talk of disruption the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy Case studies from broadcast networks to tech start ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period To trace these unfulfilled promises and flopped ideas Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing Yet in placing this now forgotten material in recent historical context Social TV shows how the era altered how the industry pursues audiences Multi screen campaigns have shifted away from a focus on live TV and toward all day content streams The legacy of Social TV then is the further embedding of media and promotional material onto every screen and into every moment of life
