**Computational Neural Networks for Geophysical Data Processing** M.M. Poulton, 2001-06-13 This book was primarily written for an audience that has heard about neural networks or has had some experience with the algorithms but would like to gain a deeper understanding of the fundamental material. For those that already have a solid grasp of how to create a neural network application this work can provide a wide range of examples of nuances in network design data set design testing strategy and error analysis. Computational rather than artificial modifiers are used for neural networks in this book to make a distinction between networks that are implemented in hardware and those that are implemented in software. The term artificial neural network covers any implementation that is inorganic and is the most general term. Computational neural networks are only implemented in software but represent the vast majority of applications. While this book cannot provide a blue print for every conceivable geophysics application it does outline a basic approach that has been used successfully. [Statistical Methods for Earthquake Hazard Assessment and Risk Analysis](#) G. R. Dargahi-Noubary, 2000 Hazard assessment and risk analysis of natural disasters requires detailed analysis of the available information. The raw material of such investigations are the past data which are often incomplete and insufficient. Due to the nature of the problem statistical methods have been increasingly used in hazard assessment and risk analysis of disasters such as earthquakes high speed winds and floods. Although most of the classical theories have been utilized for this purpose there are still many important areas which have not received

enough attention This book is devoted to description of some statistical theories and methods and discussion of their relevance to hazard assessment of natural disasters in general and earthquakes in particular Except for introductory material different chapters of the book are made independent from each other whenever possible This is done in the expense of covering the same material in several places In doing so our goal was to make it easier for readers who seek to learn and apply a particular method Also to facilitate this theories utilized are described in detail in the corresponding chapters
