 Business, Second Edition** J. A. John, D. Whitaker, D.G. Johnson, 2005-08-29 Business students need the ability to think
 statistically about how to deal with uncertainty and its effect on decision making in business and management Traditional
 statistics courses and textbooks tend to focus on probability mathematical detail and heavy computation and thus fail to meet
 the needs of future managers Statistical Thinking in Business Second Edition responds to the growing recognition that we
 must change the way business statistics is taught It shows how statistics is important in all aspects of business and equips
 students with the skills they need to make sensible use of data and other information The authors take an interactive
 scenario based approach and use almost no mathematical formulas opting to use Excel for the technical work This allows
 them to focus on using statistics to aid decision making rather than how to perform routine calculations New in the Second
 Edition A completely revised chapter on forecasting Re arrangement of the material on data presentation with the inclusion
 of histograms and cumulative line plots A more thorough discussion of the analysis of attribute data Coverage of variable
 selection and model building in multiple regression End of chapter summaries More end of chapter problems A variety of
 case studies throughout the book The second edition also comes with a wealth of ancillary materials provided on a CD ROM
 packaged with the book These include automatically marked multiple choice questions answers to questions in the text data
 sets Excel experiments and demonstrations an introduction to Excel and the StiBstat Add In for stem and leaf plots box plots
 distribution plots control charts and summary statistics Solutions to end of chapter exercises and powerpoint slides for
 lecturers are available directly from the publisher Statistical Analysis for Decision Making Morris Hamburg, 1983
