Doing Good Science in Middle School, Expanded 2nd Edition Olaf Jorgenson,Rick Vanosdall,Vicki Massey,Jackie Cleveland,2014-04-01 We are among those who have come to enjoy the blossoming intellects often comical behaviors and insatiable curiosity of middle schoolers and choose to work with them With more than 130 years of combined experience in the profession we ve gathered a lot of ideas to share We know from our

interactions with educators around the country that precious few quality resources exist to assist science teachers in the middle and this was a central impetus for updating Doing Good Science in Middle School From the preface This lively book contains the kind of guidance that could only come from veterans of the middle school science trenches The authors know you're crazy busy so they made the book easy to use whether you want to read it cover to cover or pick out sections to help you with lesson planning and classroom management They also know you face new challenges so they thoroughly revised this second edition to meet the needs of today's students The book contains big picture concepts such as how to understand middle school learners and explore the nature of science with them a comprehensive overview of science and engineering practices STEM and inquiry based middle school science instruction aligned with A Framework for K 12 Science Education and the Next Generation Science Standards 10 new and updated teacher tested activities that integrate STEM with literacy skill building information on best instructional practices and professional development resources and connections to the Common Core State Standards in English language arts and mathematics If you're a new teacher you'll gain a solid foundation in how to teach science and engineering practices while better understanding your often enigmatic middle grade students If you're a veteran teacher you'll benefit from a fresh view of what your colleagues are doing in new times Either way Doing Good Science in Middle School is a rich opportunity to reaffirm that what you do is good science

**Middle School Girls and Their Perceptions of STEM Disciplines from the Perspective of Middle School Math and Science Teachers** Christine Demore,2018 Girls lose interest in science and math and other STEM disciplines science technology engineering and math during the middle school years This loss of interest has affected girls and the representation of women in STEM careers The purpose of the study was to investigate the role that middle school science and math teachers have in shaping girls attitudes and motivation and their perception of girls This study gathered data through a mixed methods approach Instruments used in this study included a Google survey consisting of Likert scale questions and individual interviews with participants The study asked three research questions 1 In suburban middle schools is there a gender difference among students in STEM activities or subjects 2 Do middle school teachers treat boys differently from girls in reinforcing their self image of ability in math and science 3 Are there gender differences in middle school students perceptions of their abilities in math and science The results of this study indicate that middle school girls do not have a negative perception towards STEM science or math as perceived by their teachers Middle school girls are

participating in science and math often take the initiative when working in groups and pursue leadership roles in groups. This study also has proven that girls are called upon just as much as boys in these subject areas and girls do not shy away from challenging work as compared to boys. Girls are also more likely to finish their assignments in an organized and efficient way. Teachers are cognizant of the role that they play in helping their students reach their true potential in STEM subjects especially girls. Teachers in the study encouraged all their students to take risks in the classroom when completing challenging STEM related lessons and participation among boys and girls were mostly the same at this age level with only a slight variation. Responses from middle school teachers suggested that they provide substantial support and encouragement to girls in STEM a finding that is very different from other studies and research that has previously been conducted.

Summer Bridge Activities Middle School Frankie Long, Leland Graham, James Michael Orr, Francesca D'Amico, 1998-06  
Summer activities for children moving from grade 6 to grade 7 along with instructions and advice for parents who will be supervising the activities. **More Everyday Engineering** Richard H. Moyer, Susan A. Everett, 2016-08-01 What makes a windup toy get up and go? How does an earbud operate? And why does the line you're waiting in always seem the slowest? Get middle schoolers engaged in the fascinating science behind familiar items with More Everyday Engineering! Like Everyday Engineering, this compilation brings together activities based on the Everyday Engineering columns from NSTA's award-winning journal Science Scope. Thirteen hands-on investigations focus on three aspects of engineering: designing and building, reverse engineering to learn how something works, and constructing and testing models. Like the original collection, this book is easy to use. Each investigation is a complete lesson that includes in-depth teacher background information, expected sample data, a materials list, and a student activity sheet for recording results. The activities use simple, inexpensive materials you can find in your science classroom or at a dollar store. Whether you're a teacher, parent, or enrichment program leader, go beyond the usual bridge building and egg drop activities. Spark curiosity with appealing activities that will help middle schoolers understand that engineering truly is a part of their everyday lives.
