individual cooling units in each building district cooling utilizes a network of pipes to transport chilled water or air from a  
central plant to connected buildings providing a more efficient and sustainable cooling

*energy implications of chilled water plant design and operation* - Feb 09 2023

web oct 25 2019 the true energy usage and electrical demand of the chiller varies month to month and hour by hour based  
on the loads in the building likewise the chilled water pumps condenser water pumps and cooling towers will also adapt to  
the changing building load and outside air conditions such as temperature and humidity
