Baker, 2008 Warns that companies can no longer ignore the growing power of its intellectual capital Introducing the three components of intellectual capital human capital structural capital and social capital and how to leverage them to create wealth in today's economy this book discusses the physical fallacy why wealth no longer consists of tangible things but of ideas and imagination from human minds the new shift taking place in the economy from manual and service workers to knowledge workers how to harness and capture the significant intellectual capital within today's companies how to develop and attract human capital to your company and how to create a knowledge bank in order to leverage a firm's intellectual capital in the most effective manner from inside cover **The Joint Commission Journal on Quality Improvement**, 1997-07

**International Review of Public Administration**, 2003 **Building the New Managerialist State** Denis Saint-Martin, 2000 In the 1980s and 1990s the world of governance witnessed a far reaching change from the Weberian model of bureaucracy to the new managerialism a term used to describe the group of ideas imported from business and mainly brought into government by management consultants Over the past fifteen years the British French and Canadian governments have spent growing sums of money on consulting services and as a result policy makers inside the state have increasingly been exposed to the business management ideas that consultants bring into the public sector Nevertheless there are major differences in the extent to which reformers in the three countries embraced these ideas in the process of bureaucratic reform Accordingly this is a book about policy change and variation It seeks to explain why the changes produced by the new managerialism have been more radical in some countries than in others Building the New Managerialist State shows that the political reception given by governments to managerialist ideas has been significantly shaped by the openness of policy making institutions to outside expert knowledge and on the organization development and social recognition of management consultancy *The Principals* L. Joseph Matthews, Gary Monroe Crow, 2010 The Principals allows readers to gain a broader more complex and accurate understanding of school administrator leadership in today's learning communities while presenting an expansive view of leadership within schools not limited to the responsibilities of the principal but including those of assistant principals administrators teachers and students This innovative first edition text presents a complete picture of the principal as school administrator community builder advocate manager mentor supervisor politician leader and learner The Principals covers the importance of learning the learning of principals the learning of other professionals and especially the learning of students School improvement is not possible without this across the board learning and exploration and this text places a strong emphasis on this simple but often overlooked aspect of school

communities Today s school systems are faced with a number of fresh challenges changing student populations rapidly expanding research knowledge increasing accountability requirements federal and state policy demands and escalating expectations for school services This book will help aspiring school leaders to bridge the gap between traditional conceptualizations of the principal and more innovative functional and multifaceted conceptualizations that respond to the changing conditions and higher demands of contemporary learning communities     *David D.
