## **The Wittgenstein House:**

**The Wittgenstein House** Bernhard Leitner,2000-12 Related to author s Architecture of Ludwig Wittgenstein 1973

**Wittgenstein's House** Nana Last,2008 The book advances the radical proposition that the field in which architecture and philosophy operate includes linguistic and spatial practices It develops innovative forms of interdisciplinary analyses to demonstrate that the philosophical positions put forth by Wittgenstein s two main works are literally unthinkable outside of their respective conceptions of space the view from above in the early work and the view from within constructed by the later work **BOOK JACKET Die Rettung des Wittgenstein Hauses in Wien vor dem Abbruch** Bernhard Leitner,2013 The demolition of the Wittgenstein House had been approved by the landmark preservation office the City of Vienna in June 1971 It was only stopped at the last minute Bernhard Leitner collected unique photographs as well as facsimiles of documents that illustrate the incredible odyssey that ended in the rescue of this architectural jewel itectural jewel

**The Wittgenstein House** Lynn S. Calesnick,1981 **The House of Wittgenstein** Alexander Waugh,2010-04-20 The House of Wittgenstein is the grand saga of a brilliant and tragic Viennese family whose members included a famous philosopher and the world s greatest one handed classical pianist The Wittgenstein family was one of the wealthiest most talented and most eccentric in European history held together by a fanatical love of music yet torn apart by money madness conflicts of loyalty and the upheaval of two world wars Of the eight children three committed suicide Paul lost an arm in the war and yet stubbornly pursued a musical career and Ludwig the odd youngest son is now regarded as one of the greatest philosophers of the twentieth century Alexander Waugh author of the acclaimed memoir Fathers and Sons and himself the offspring of a famous and eccentric family tells their baroque tale with a novelistic richness to rival Thomas Mann s Buddenbrooks **Wittgenstein's House** Nana Last,2022 Wittgenstein s House reads Wittgenstein s his two main philosophical texts Tractatus Logico Philosophicus and Philosophical Investigations in relation to an experience that intervened between them his design and construction of the Stonborough Wittgenstein house in Vienna Arguing that the practice of architecture occupies not just a historical position between Wittgenstein s early and late philosophy but a conceptual position as well the book demonstrates that Wittgenstein s practice of architecture constitutes a fundamental component in the development of his philosophy of language from its early to late phases The book advances the radical proposition that the field in which architecture and philosophy operate includes linguistic and spatial practices It develops innovative forms of interdisciplinary analyses to demonstrate that the philosophical positions put forth by Wittgenstein s two main works are literally unthinkable outside of their respective conceptions of space the view from above in the early work and the view from within constructed by the late work To examine the manner in which Wittgenstein s practice of architecture insinuated itself into his philosophy the author interweaves in depth analyses of the spatial constructs underpinning the early and late philosophies with conceptual formal and operative discussions of the design of the Stonborough Wittgenstein house Together these discussions reveal how

Wittgenstein's practice of architecture engaged philosophical concepts through which it influenced Wittgenstein's philosophy of language. At the heart of this approach is the finding that the philosophical concepts at the core of Wittgenstein's philosophy are indeed spatial ones including his concerns with the limits of language, the boundary between showing and saying, the intricate textual numbering systems he devises, the relationship between the interiority of the subject and the publicness of language and the formative principle of family resemblance.

### **Architektur Von Ludwig Wittgenstein**

Bernhard Leitner, 1995. First published in 1973 this text features the Wittgenstein House in Vienna. Declared a national monument in 1972 by the Vienna Landmark Commission it was faithfully restored in 1973. Ludwig Wittgenstein designed the house in 1927-1928 for his sister. Although he had no professional architectural qualification the interior of this building is quite unique every detail has been rethought and appears to be uninfluenced by any building convention or style whilst the cubic forms of the building's exterior reveal the influence of Adolf Loos.

### Adolf Loos Joseph Masheck, 2013-03-21

Widely regarded as one of the most significant prophets of modern architecture Adolf Loos was a celebrity in his own day. His work was emblematic of the turn of the century generation that was torn between the traditional culture of the nineteenth century and the innovative modernism of the twentieth. His essay Ornament and Crime equated superfluous ornament and decorative arts with tattooing in an attempt to tell modern Europeans that they should know better. But the negation of ornament was supposed to reveal not negate good style and an incorrigible ironist has been taken too literally in denying architecture as a fine art. Without normalizing his edgy radicality Masheck argues that Loos' masterful astylistic architecture was an appreciation of tradition and utility and not as most architectural historians have argued a mere repudiation of the florid style of the Vienna Secession. Masheck reads Loos as a witty ironic rhetorician who has all too often been taken at face value. Far from being the anti architect of the modern era Masheck's Loos is an unruly yet integrally canonical artist architect. He believed in culture, comfort, intimacy and privacy and advocated the evolution of artful architecture. This is a brilliantly written revisionist reading of a perennially popular architect.

### The Meaning of Modern Architecture Hans Rudolf

Morgenthaler, 2016-03-09. Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings. This method was first developed as scholars realized that the new abstract art appearing needed to be analysed differently than the previous figurative works. Since architecture experienced a similar development in the 1920s and 30s this book argues that the empathetic method can also be used in architectural interpretation. While most existing scholarship tends to focus on formal and functional analysis this book proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features. Instead by relying on the viewer's innate psycho-physiological perceptive abilities sensual and intuitive understandings of composition, form and space are emphasized. These aspects are especially significant because Modern

Architecture lacks the traditional stylistic signs Including building analyses it shows how by visually reducing cubical forms and spaces to linear configurations the exteriors and interiors of Modern buildings can be interpreted via human perceptive abilities as dynamic movement systems commensurate with the new industrial transportation age This reveals an inner necessity these buildings express about themselves and their culture rather than just an explanation of how they are assembled and how they should be used The case studies highlight the contrasts between buildings designed by different architects rather than concentrating on the few features that relate them to the zeitgeist It analyses the buildings directly as the objects of study not indirectly as designs filtered through a philosophical or theoretical discourse The book demonstrates that with technology and science affecting culture

### **The Architecture of Error**

Francesca Hughes,2014-10-31 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline s needs anxieties and desires When architects draw even brick walls to six decimal places with software designed to cut lenses it is clear that the logic that once organized relations between precision and material error in construction has unraveled Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness Meanwhile error and the always political space of its dissent has reconfigured itself In The Architecture of Error Francesca Hughes argues that behind the architect s acute fetishization of redundant precision lies a special fear of physical error What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks as by an unspoken horror of loss of control over error material life and everything that matter stands for Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials the proliferation of material testing and the rhetorical obstacles that blighted cybernetics Why is it she asks that the more we cornered physical error the more we feared it Hughes s analysis of redundant precision exposes an architecture of fear whose politics must be called into question Proposing error as a new category for architectural thought Hughes draws on other disciplines and practices that have interrogated precision and failure citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark Barbara Hepworth Rachel Whiteread and others These non architect practitioners she argues show that error need not be excluded and precision can be made accountable
