## **The Wolf In The Southwest The Making Of An Endangered Species:**

*The Wolf in the Southwest* David Earl Brown,1983 A history of the eradication of the Southwestern wolf drawn from reports of the federal Office of Predatory Animal and Rodent Control and from accounts of wolf hunters themselves with information on wolf biology from those who best knew their habits     **Confessions of an Eco-Warrior** Dave Foreman,2016-07-20 A book that will set the course for the environmental movement for years to come Confessions of an Eco Warrior is an inspiring ecological call to arms by America s foremost and most controversial environmental activist Rude and brilliant Read it and you will see the future William Kittredge     Navajo and the Animal People Steve Pavlik,William B Tsosie,2014-07-01 This text examines the traditional Navajo relationship to the natural world Specifically how the tribe once related to the Animal People and particularly a category of animals which they collectively referred to as the naatl eetsoh the ones who hunt These animals like Native Americans were once viewed as impediments to progress requiring extermination

*Design with the Desert* Richard Malloy,John Brock,Anthony Floyd,Margaret Livingston,Robert H. Webb,2016-04-19 Typical development in the American Southwest often resulted in scraping the desert lands of the ancient living landscape to be replaced with one that is human made and dependent on a large consumption of energy and natural resources This transdisciplinary book explores the natural and built environment of this desert region and introduces development tools for shaping its future in a more sustainable way It offers valuable insights to help promote ecological balance between nature and the built environment in the American Southwest and in other ecologically fragile regions around the world     **Journal of the Arizona-Nevada Academy of Science** Arizona-Nevada Academy of Science,1983     *Southwestern American Literature* ,1999     The Journal of Wildlife Management ,2000     **New Mexico Magazine** ,2011     *American Indian Culture and Research Journal* ,2000     The Publishers' Trade List Annual ,1992     **Proceedings** ,2007     **Ecology and Conservation of Wolves in a Changing World** Ludwig N. Carbyn,Steven H. Fritts,Dale R. Seip,Canadian Circumpolar Institute,1995 This book is a compilation of selected papers presented at the Second North American Symposium on Wolves held in Edmonton in August 1992     **Endangered** Mitch Tobin,2010 Award winning journalist goes to the frontlines of the battle for endangered species and the desert environment     **Science and Stewardship to Protect and Sustain**

**Wilderness Values** ,2003 The Seventh World Wilderness Congress met in Port Elizabeth South Africa in 2001 The symposium on science and stewardship to protect and sustain wilderness values was one of several symposia held in conjunction with the Congress The papers contained in this proceedings were presented at this symposium and cover seven topics state of knowledge on protected areas issues in South Africa traditional and ecological values of nature wilderness systems and approaches to protection protection of coastal marine and river lake wilderness spiritual benefits religious beliefs and new stories personal and societal values of wilderness and the role of science education and collaborative planning in wilderness protection and restoration     *Predatory Bureaucracy* Michael J. Robinson,2005 Predatory

Bureaucracy is the definitive history of America's wolves and our policies toward predators Tracking wolves from Coronado's day to the present author Michael Robinson shows that their story merges with that of the U.S. Bureau of Biological Survey This federal agency was chartered to research insects and birds but because of various pressures morphed into a political powerhouse operating wildlife extermination programs Drawing on deep research and wide reading Robinson's narrative follows the wolves from the eras of explorers and mountain men through the wolves 120 year entanglement with the federal government He shares the parallel story of the Survey's rise detailing the forces that allowed extermination programs to continue despite opposition from hunters animal lovers scientists environmentalists and presidents though the agency's mission and even its name changed Predatory Bureaucracy will fascinate readers interested in environmental politics and wildlife    **Sacred Violence** Wade Hall,Rick Wallach,2002    Large Mammal Restoration David Maehr,Reed F.

Noss,Jeffery L. Larkin,2001-10 Evidence is mounting that top carnivores and other large mammals play a pivotal role in regulating ecosystem health and function yet those are the species that are most likely to have been eliminated by past human activities In recent decades numerous efforts have been undertaken to return some of the species that were previously extirpated on local or regional scales Large Mammal Restoration brings together for the first time detailed case studies of those efforts from restoring elk in Appalachia to returning bison herds to the Great Plains to the much publicized effort to bring back the gray wolf to Yellowstone National Park Together these case studies offer important lessons and new ways of thinking for wildlife managers and conservation biologists involved with restoration programs Sections examine approaches to determining the feasibility of a restoration program critical hands on aspects of restoring large mammals obtaining public input into the process and gaining community support for programs the potential of some species to return without direct human intervention and what can be done to facilitate that natural colonization An introductory chapter by Reed F Noss explores some of the reasons for restoring large mammals as well as some of the ecological and social complications and a concluding overview by David S Maehr discusses the evolutionary importance of large mammal restoration Contributors include Paul C Paquet Barbara Dugelby Steven H Fritts Paul R Krausman Larry D Harris Johnna Roy and many others Large Mammal Restoration brings together in a single volume essential information on the lessons learned from previous efforts providing an invaluable resource for researchers and students of conservation biology and wildlife management as well as for policymakers restoration advocates and others involved with the planning or execution of a restoration program    **Changing Tracks** Timothy Rawson,2001 A century ago nearly all Americans agreed that the fewer wolves the better Now many people ardently defend wolves for ecological ethical spiritual and symbolic reasons Changing Tracks chronicles the issue that helped reshape our views toward predators The wolf sheep controversy in Mt McKinley Denali National Park Alaska had a profound impact on the evolving definition of National Park Service policy and still echoes in today's discussions of wildlife management In the 1930s the Park Service began to question the existing purpose of parks

as game refuges Wolves had been extirpated in other parks but when the service stopped killing them in McKinley concern for the declining Dall sheep population aroused antiwolf sentiment The ensuing argument over park wildlife policy lasted more than twenty years as Alaskans and the nation's sportsmen urged vigorous wolf control rather than letting a natural balance prevail in the park The controversy brought Park Service biologist Adolph Murie to Alaska where he conducted the first scientific study of wolf ecology Yet politics and sentiment proved more important than science dictating agency action as is often the case in public policy Arguments over wolves in Alaska and elsewhere now seem endless and they started here Changing Tracks is an essential Alaska story but the issues constitute a cornerstone of conservation history that has been replayed in ecological management and philosophy worldwide Changing Tracks is exceedingly well written and a pleasure to read *Journal of the History of Biology* A n important contribution to the literature of national park history and of the wolf In tracing the story Rawson was able to shed light on the larger stories of changing attitudes toward animals especially game and predatory animals in American history in general and national park history in particular Environmental History Timothy Rawson has written a splendid book He spans philosophy evolving perceptions biology politics agency principles and pragmatics and ethics He writes with facility and style because he has mastered the vast documentary trove that holds the story Across all this rugged terrain Rawson retains his balance and provides historical perspectives true to the times he records It is all in this beautifully written and researched book as they say in the trade it is a page turner Alaska History Few subjects illustrate shifting notions of wilderness in national parks better than the treatment of wolves Rawson's account provides a rare opportunity to see how agency leaders decide what was in the best interest of wild nature and the nation this work is informative and compelling and a valuable addition to our understanding of nature *Pacific Northwest Quarterly*

*Proceedings RMRS.* ,1998     *The Big Outside* Dave Foreman,1992 Dave Foreman and Howie Wolke identify America's 368 remaining wilderness areas by state and region They describe for each the diversity of its flora and fauna threats of industrial exploitation or commercial development and legal status as a protected area With practical information and a sense of urgency The Big Outside is both a guide and an inspiration for all those interested in seeing and preserving what's left of wild America Illustrations
