television show The Woodwright's Eclectic Workshop. This book features step by step instructions for such popular projects as the Adirondack chair, tavern table, folding ladder, rocking horse, lathe and kayak. All projects are illustrated with photographs and measured drawings. The book also includes colorful descriptions of what it was like to be a tradesperson who made a living by hand working with the tools and methods Roy describes on television and in his books. Carpenters, joiners, wheelwrights, millwrights, chairmakers and blacksmiths. As Roy puts it, he wants to examine the old paths in the way that they were originally taken, not as adventuresome recreations but a profession that put food on the table and clothes on the kids. *The Woodwright's Guide Working Wood with Wedge and Edge* Roy shows how to engage the mysteries of the splitting wedge and the cutting edge to shape wood from forest to furniture. Beginning with the standing tree, each chapter of *The Woodwright's Guide* explores one of nine trades of woodcraft: faller, countryman, and cleaver, hewer, log builder, sawyer, carpenter, joiner, turner, and cabinetmaker. Hundreds of detailed drawings by Eleanor Underhill Roy's daughter illustrate the hand tools and processes for shaping and joining wood. A special concluding section contains detailed plans for making your own foot powered lathes, workbenches, shaving horses and taps and dies for wooden screws.
