**Urban Centres in Asia and Latin America** Simone Sandholz, 2016-09-20. This book presents an overview of the challenges that cities in Latin America and Asia are facing regarding the preservation of their tangible and intangible heritage. It argues that urban heritage has a value that transcends the mere object's value, constituting a crucial source of identity for urban inhabitants. The same is true for the urban intangible values and practices that are often associated with places or buildings. The empirical research is based on case studies of Kathmandu in Nepal, Yogyakarta in Indonesia and Recife in Brazil, three cities that still comprise core areas with a high percentage of historic fabric and distinctive cultural expressions. The comparative study of the three areas reveals the similarities and differences of urban conservation policies, past and present upgrading strategies in the core areas and the importance of tangible and intangible heritage. All three cities demonstrate that urban heritage habits and beliefs are still of importance to the population. While there are significant differences in the kind and level of protection, the respective legal system provides partly uncontrolled urban dynamics pose a threat to all of them. The text is based on a PhD thesis submitted to the Institute of Geography, University of Innsbruck, Austria.

**Livability and Sustainability of Urbanism** Bagoes Wirymartono, 2019-07-09. This book is a fascinating wide reaching interdisciplinary examination of urbanism in the context of humanities and social sciences research, comprising cutting edge theoretical and empirical investigations of urban livability and sustainability. Urban livability is explored as a phenomenon of happenings that gather people, things and domains in the specific spatiotemporal context of the city; this context is the life world of urbanism. Meanwhile, sustainability is conceived of as the capacity of urbanism that enables people to cultivate their

sociocultural and economic existence and development without the depletion of their current resources in the future In this study phenomenology is uniquely incorporated as a way of seeing things according to their presence in space and time
