Public Policy in the 'Asian Century' Sara Bice, Avery Poole, Helen Sullivan, 2017-12-16 This volume explores the defining features critical approaches challenges and opportunities for public policy in the Asian Century This is the first book to systematically analyse the key institutions and practices that comprise public policy administration and governance to investigate how they are changing in the context of increasing Asian influence Its authors argue that the Asian Century holds the potential to generate a paradigm shift equivalent to the impacts of neo liberalism and the New Public Management of the late 20th century Divided into three parts this volume interrogates the theories underpinning contemporary public policy explores case studies from different policy arenas across the Asian region and imagines what a future of globalised public policy might look like It examines the implementation measures necessary to support policy and administration in an era of transnational governance networks tightly linked economic markets and progressively fluid cultural exchanges This book provides the concepts and tools necessary to navigate these shifting sands successfully It is essential reading for scholars of public policy public management international relations and politics and social sciences as well as for administrators and public servants **Understanding Korean Public Administration** Kwang-Kook Park, Wonhee

Lee, Seok-Hwan Lee, 2016-06-17 Although much has been written about the Korean public administration the international academic community has little knowledge about it as most of the literature has been written in Korean This book aims to provide more accessible knowledge internationally by filling that gap covering both the history and the current status of the

Korean public administration This book is a collaboration of many Korean public administration scholars and would appeal to those interested in the secrets of Korea's rapid development in such a short span of time Each chapter covers historical contexts key to understanding its public administration and an important aspect as Korea is a fast changing society The book takes on a more pragmatic approach rather than to put the Korean experiences into the western theory Each chapter therefore provides an extensive discussion on the lessons learned and practical implications Urban Music Education Kate Fitzpatrick-Harnish, 2015 Through the lens of contextually specific teaching this book provides a counternarrative on urban music education that encourages urban music teachers to focus on the strengths of their students as their primary resource

Valuable Partnerships Robert J. Sullivan, 2019-07-29 Valuable Partnerships Cooperation Innovation and the Future of Municipal Texas bridges rich scholarship and practical application to produce an important reference for local government scholars and practitioners alike by covering the dynamic approaches altering how Texas municipalities operate Valuable Partnerships investigates the efficacy of the American fragmented municipal model comprised of 89 000 jurisdictions Critics consistently criticize this decentralized model while arguing for a regional structure yielding greater efficiencies and scalability that also solves the twin problems of equity and service delivery inequalities Conversely Valuable Partnerships presents evidence that Texas local governments leverage regional cooperation and innovation to achieve these results without the political and structural upheaval The author utilizes historic analysis benchmark results socioeconomic measures and budgetary data to demonstrate how Texas governments increase service performance and reduce the burden to taxpayers Such results support a counter thesis to the structural regionalism hypothesis by presenting findings that Texas local jurisdictions embracing regional cooperation and data analytics will experience the same benefits **Governance and Leadership in Shrinking Cities** Stanisław Mazur, 2023-08-24 The aim of this publication is to look in depth at depopulation a trend that is affecting an increasing number of cities worldwide It has recently become a critical issue with a range of detrimental social economic spatial and financial consequences However attempts by central and local governments to combat depopulation have yet to yield satisfactory results Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions mobilizing resources and creating networks to address the problem has been underestimated Moreover according to the authors of this monograph there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation it is impossible to pursue effective public policies in this regard This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives Further the book

provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists planners social geographers economists and architects The Urban Experience Barry Bluestone,Russell B and Andree B Stearns Professor Emeritus of Public Policy Barry Bluestone,Mary Huff Stevenson,Associate Professor of Economics and Coordinator of the Urban Studies Minor Russell E Williams,Russell E. Williams,2022-01-05 The Urban Experience provides a fresh approach to the study of metropolitan areas by combining economic principles social insight and political realities with an appreciation of public policy to understand how U S cities and suburbs function in the 21st century The new edition will feature a new cohesive framework called the Metropolitan Area Dynamic introduced in the first chapter of the book then incorporated into every chapter to demonstrate the demographic economic political social and public policy forces that impact metropolitan areas The narrative of the book is grounded in the real life experiences of students and their families on the premise that there is a fascination about one s own surroundings to engage the students in their study It uses a great deal of historical and comparative data to explore the wide variation in how we experience urban and suburban communities and will include greater discussion of cities worldwide to engage with large scale global issues like climate change immigration migration and inequality It addresses the changing role and function of U S metropolitan areas in an age of growing global competition and focuses on key contemporary problems facing cities and suburbs Providing an interdisciplinary approach to the topic the book introduces analyses from economics sociology and political science urban studies and public policy as useful tools to understand the evolution and current status of the nation s urban areas The book will be a valuable text for urban scholars public officials and all those interested in understanding urban dynamics **Applied Physics in the 21st Century**
