Discusses the latest research results and offers new information on treatment options. Features the expertise of international authorities providing a worldwide perspective. Uses a templated four color format that makes information accessible and easy to understand particularly the basic science concepts    **The Boundaries of Consciousness: Neurobiology and Neuropathology** Steven Laureys, 2006-06-09 Consciousness is one of the most significant scientific problems today. Renewed interest in the nature of consciousness a phenomenon long considered not to be scientifically explorable as well as increasingly widespread availability of multimodal functional brain imaging techniques EEG ERP MEG fMRI and PET now offer the possibility of detailed integrated exploration of the neural behavioral and computational correlates of consciousness. The present volume aims to confront the latest theoretical insights in the scientific study of human consciousness with the most recent behavioral neuroimaging electrophysiological pharmacological and neuropathological data on brain function in altered states of consciousness such as brain death coma vegetative state minimally conscious state locked in syndrome dementia epilepsy schizophrenia hysteria general anesthesia sleep hypnosis and hallucinations. The interest of this is threefold. First patients with altered states of consciousness continue to represent a major clinical problem in terms of clinical assessment of consciousness and daily management. Second the exploration of

brain function in altered states of consciousness represents a unique lesional approach to the scientific study of consciousness and adds to the worldwide effort to identify the neural correlate of consciousness. Third new scientific insights in this field have major ethical and social implications regarding our care for these patients. **Taking Persons Seriously**

Mihretu P. Guta, Scott B. Rae, 2024-06-06. This volume attempts to show why ontology matters for a proper grasp of issues in bioethics. Contemporary discussions on bioethics often focus on seeking solutions for a wide range of issues that revolve around persons. The issues in question are multi layered involving such diverse aspects as the metaphysical, ontological, personal, medical, moral, legal, cultural, social, political, religious, and environmental. In navigating through such a complex web of issues, it has been said that the central problems philosophers and bioethicists face are ethical in nature. In this regard, biomedical sciences and technological breakthroughs take a leading role in terms of shaping the sorts of questions that give rise to ethical problems. For example, is it ethical to keep terminally ill patients alive on dialysis machines or artificial ventilators? Is it ethical to take someone's vital organs upon death and transplant them into another person's body without any prior consent from the deceased person? Reproductive techniques also raise complicated ethical issues involving in vitro fertilization, contraceptives, prenatal testing, abortions, and genetic enhancements. Moreover, biomedical issues raise ethical problems regarding research on human subjects, stem cell research, and enhancement biotechnology. The beginning and end of life issues bring up their own complicated ethical conundrums involving, among other things, terminating life support and euthanasia. This book approaches such complex bioethical questions by engaging in ground level debates about the ontology of persons. This is a nonnegotiable first step in taking steps forward in seeking a plausible solution for the complex ethical problems in bioethics. **Physical Rehabilitation - E-Book**

Michelle H. Cameron, Linda G. Monroe, 2007-04-05. The only physical rehabilitation text modeled after the concepts of the APTA's Guide to Physical Therapist Practice, 2nd Edition, this detailed resource provides the most complete coverage of rehabilitation across the preferred practice patterns of physical therapy all in one place. Each chapter is consistently organized to make it easy to find the information you need with clear guidelines, examples, and summaries based on the latest clinical evidence to help you improve quality of care and ensure positive patient outcomes. In-depth evidence-based coverage of more key content areas than any other rehabilitation resource of its kind, including orthopedics, neurology, and wound management, ensures a comprehensive understanding of rehabilitation supported by the latest clinical research. More than 65 case studies present a problem-based approach to rehabilitation and detail practical real world applications. Over 600 full color illustrations clarify concepts and techniques. A FREE companion CD prepares you for practice with printable examination forms and reference lists from the text linked to Medline abstracts and reinforces understanding through interactive boards style review questions and vocabulary building exercises.

**Oxford Textbook of Medicine** David A. Warrell, 2003. The Oxford Textbook of Medicine provides all that any doctor needs to know to practice top level internal medicine. It gives comprehensive coverage of the epidemiology, aetiology, and

mechanism of disease as well as clear unambiguous coverage of the diagnosis practical management and prevention of the entire spectrum of medical disorders There are major introductory sections on the scientific basis of disease and in the system based clinical sections genetic predisposition pathophysiology pathogenesis molecular mechanisms and cell biology are covered in depth for all significant medical syndromes Clinical descriptions of diseases are clearly and memorably written based on the experience and insight of the authors many of whom are among the world's most distinguished medical scientists Chapters are not only evidence based but also on clinical experience and a thorough survey of all the relevant literature Throughout the approach of OTM is humane and ethical and at the same time factual reliable honest especially where knowledge is limited and rigorously scientific This is not just a textbook of First World medicine It provides practical guidance for doctors working in a variety of medical setting the value of a logical clinical approach rather than immediate resort to expensive imaging and laboratory tests More of the contributing authors than ever before are from outside Europe including strong representation of North American medicine The new editorial team has ensured that the OTM continues to reflect rapid changes in medical practice there are new sections on intensive care alcohol and drug abuse clinical pharmacology and therapeutics world health clinical trials and evidence based medicine adolescent medicine sports medicine and emergency medicine more than half the contributors are new for this edition and most of the text has been heavily revised The striking new page and cover design reflect the significant changes made in this new edition The Textbook is illustrated by over 2000 two color diagrams and many color Plates The index is the most detailed and user friendly of any major medical textbook in an emergency the reader can access information quickly whether on the ward in office or at home Like its predecessors OTM4 will be the trusted and ultimate reference in libraries hospitals doctors consulting rooms solicitors offices press offices and primary care practices worldwide *Brain Death and Disorders of Consciousness* Calixto Machado,D. Alan Shewmon,2004-03-31 Although some decades have passed there are still worldwide controversies about a concept of human death on neurological grounds There are also disagreements on the diagnostic criteria for brain death whether clinical alone or clinical plus ancillary tests Moreover some scholars who were strong defenders of a brain based standard of death are now favoring a circulatory respiratory standard The study of coma is extremely important because lesions of the brain are responsible for quality of life in patients or cause of death The main goal of Brain Death and Disorders of Consciousness is to provide a suitable scientific platform to discuss all topics related to human death and coma

**The Case of Terri Schiavo** Arthur L. Caplan,James J. McCartney,Dominic A.
