## **The War On Learning Gaining Ground In The Digital University:**

**The War on Learning** Elizabeth Losh, 2024-02-06 An examination of technology based education initiatives from MOOCs to virtual worlds that argues against treating education as a product rather than a process Behind the lectern stands the professor deploying course management systems online quizzes wireless clickers PowerPoint slides podcasts and plagiarism detection software In the seats are the students armed with smartphones laptops tablets music players and social networking Although these two forces seem poised to do battle with each other they are really both taking part in a war on learning itself In this book Elizabeth Losh examines current efforts to reform higher education by applying technological solutions to problems in teaching and learning She finds that many of these initiatives fail because they treat education as a product rather than a process Highly touted schemes video games for the classroom for example or the distribution of iPads let students down because they promote consumption rather than intellectual development Losh analyzes recent trends in postsecondary education and the rhetoric around them often drawing on first person accounts In an effort to identify educational technologies that might actually work she looks at strategies including MOOCs massive open online courses the gamification of subject matter remix pedagogy video lectures from Randy Pausch to the Baked Professor and educational virtual worlds Finally Losh outlines six basic principles of digital learning and describes several successful university based initiatives Her book will be essential reading for campus decision makers and for anyone who cares about education and technology

MOOCs, High Technology, and Higher Learning Robert A. Rhoads, 2015-10-30 The first book to explore the rise of MOOCs through a social science lens In *MOOCs High Technology and Higher Learning* Robert A Rhoads places the OpenCourseWare OCW movement into the larger context of a revolution in educational technology In doing so he seeks to bring greater balance to increasingly polarized discussions of massively open online courses MOOCs and show their ongoing relevance to reforming higher education and higher learning Rhoads offers a provocative analysis of a particular moment in history when cultural political and economic forces came together with evolving teaching and learning technologies to bring about the MOOC He argues persuasively that the OCW and MOOC movements have had a significant impact on the digitalization of knowledge and that they have helped expand the ways students and teachers interact and develop ideas collaboratively He also critically analyzes the extensive media coverage of MOOCs while examining empirical studies of MOOC content delivery the organizational system supporting the OCW MOOC movement and faculty labor concerns Too often technology advocates champion the MOOC movement as a solution to higher education's challenges without recognizing the pedagogical social and economic costs *MOOCs High Technology and Higher Learning* challenges many of the democratic claims made by MOOC advocates pointing to vast inequities in the ways MOOCs are presented as an alternative to brick and mortar access for low income populations This book offers a clear eyed perspective on the potential and peril of this new form of education

Challenges and Opportunities for the Global Implementation of E-Learning Frameworks Khan,

Badrul H.,Affouneh, Saida,Hussein Salha, Soheil,Najee Khlaif, Zuheir,2021-02-19 As schools continue to explore the transition from traditional education to teaching and learning online new instructional design frameworks are needed that can support with the development of e learning content The e learning frameworks examined within this book have eight dimensions 1 institutional 2 pedagogical 3 technological 4 interface design 5 evaluation 6 management 7 resource support and 8 ethical Each of these dimensions contains a group of concerns or issues that need to be examined to assess and develop an institutions e capability in order to introduce the best e learning practices Challenges and Opportunities for the Global Implementation of E Learning Frameworks presents global perspectives on the latest best practices and success stories of institutions that were able to effectively implement e learning frameworks An e learning framework is used as a guide to examine e learning practices in countries around the globe to reflect on opportunities and challenges for implementing quality learning In this book therefore tips for success factors and issues relevant to failures will be presented along with an analysis of similarities and differences between several countries and educational lessons While highlighting topics such as course design and development ICT use in the classroom and e learning for different subjects this book is ideal for university leaders practitioners in e learning continuing education institutions government agencies course developers in service and preservice teachers administrators practitioners stakeholders researchers academicians and students seeking knowledge on how e learning frameworks are being implemented across the globe Crowdsourcing for Innovation in Higher Education Regina Lenart-Gansiniec,Łukasz Sułkowski,2022-11-11 Significant disruption to the educational sector occurred due to the COVID 19 pandemic This shed a light on the need for new delivery methods and greater collaboration which has become urgent and obvious as existing structures and traditional channels have struggled to cope or shut down Higher education institutions often fail to crowdsource successfully because crowds differ in how they are organized compared to traditional sourcing Instead of managing higher education institutions work with external contributors who self select into the process Crowdsourcing has significant potential to transform the education space by enhancing existing methodologies and offering innovative possibilities to develop new pedagogical techniques This offers benefits for practitioners institutions students and participants Drawing on theory and best practice illustrated with a wide range of the examples and cases Crowdsourcing for Innovation in Higher Education offers invaluable guidance and will be of interest to researchers academics policymakers and students in the fields of higher education development studies organizational studies management science and knowledge management *The Routledge Companion to Reinventing Management Education* Chris Steyaert,Timon Beyes,Martin Parker,2016-06-17 The position and role of the business school and its educational programmes have become increasingly prominent yet also questioned and contested What management education entails and how it is enacted has become a matter of profound concern in the field of higher education and more generally for the development of the organized world Drawing upon the humanities and social sciences The Routledge

Companion to Reinventing Management Education imagines a different and better education offered to students of management entrepreneurship and organization studies It is an intervention into the debates on what is taught and how learning takes place demonstrating both the potential and the limits of what the humanities and social sciences can do for management education Divided into six sections the book traces the history and theory of management education reimagining central educational principles and outlining an emerging practice based approach With an international cast of authors The Routledge Companion to Reinventing Management Education has been written for contemporary and future educators and for students and scholars who seek to make a difference through their practice
