**Indian Sari** Vaibhavi Pruthviraj Ranavaade, 2023-08-18. The sari has remained an essential part of culture, tradition and fashion in South Asia and India through many centuries. This book examines the variety of meanings which it carries as a symbol of Indian femininity and tradition as well as a means of creative fashion expression for modern India. It discusses the semiotic interpretations of the sari today by understanding its significance for traditional weavers, designers and people who wear saris at home, work or for religious or cultural occasions. Through surveys, interactions and interviews, the author explores the shared experience of wearing saris in different social and cultural settings across economic groups in farms and boardrooms as well as a means of creative expression for young Indians. It also looks at the processes involved in making traditional saris today, draping and weaving styles, buying behaviour, saris in pop culture, pride parades and Bollywood, and interpretations of what the sari signifies in different socio-economic circles in India. This book will be of interest to students of fashion design, fashion business, history and cultural studies. It will also be useful for professionals working in the fashion industry and designers.

**Fashioning James Bond** Llewella Chapman, 2021-09-23. *Fashioning James Bond* is the first book to study the costumes and fashions of the James Bond movie franchise from Sean Connery in 1962's *Dr No* to Daniel Craig in *Spectre* 2015. Llewella Chapman draws on original archival research, close analysis of the costumes and fashion brands featured in the Bond films, interviews with families of tailors and shirt makers who assisted in creating the look of James Bond, and considers marketing strategies for the films and tie-in merchandise that promoted the idea of an aspirational James Bond lifestyle. Addressing each Bond film in turn, Chapman questions why costumes are an important tool

for analysing and evaluating film both in terms of the development of gender and identity in the James Bond film franchise in relation to character and how it evokes the desire in audiences to become part of a specific lifestyle construct through the wearing of fashions as seen on screen. She researches the agency of the costume department director, producer and actor in creating the look and characterisation of James Bond, the villains, the Bond girls and the henchmen who inhibit the world of 007. Alongside this she analyses trends and their impact on the Bond films, how the different costume designers have individually and creatively approached costuming them and how the costumes were designed and developed from novel to script and screen. In doing so this book contributes to the emerging critical literature surrounding the combined areas of film, fashion, gender and James Bond.

**Textiles, Identity and Innovation: In Touch** Gianni Montagna, Manuela Cristina Paulo Carvalho Figueiredo, 2020-05-19. D\_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand, study, adapt and project them for the future. It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way adapting them to their objectives and research. D\_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations. Present in all areas of knowledge the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge. D\_Tex proposes to promote discussion and knowledge in the different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge, innovative and traditional techniques, technological and innovative materials and methods but also new organization and service models, different concepts and views on teaching. With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other the research and practice of textiles was proposed by the D\_TEX Textile Design Conference 2019 held June 19-21, 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme In Touch where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers.
