A Modern Utopia H G Wells, 2025-04 A modern utopia presents a

vision of an ideal society challenging traditional utopian ideas The story unfolds through a philosophical dialogue between the narrator and a botanist who embark on an intellectual journey to explore the possibilities of creating a better world Unlike static utopian visions Wells imagines a society that is dynamic adaptable and responsive to change where individuality is valued and personal freedom is prioritized The two characters discuss various social political and moral issues using their contrasting perspectives to examine the feasibility of such a society The botanist s personal struggles add depth to the narrative providing a relatable lens through which readers can engage with these larger ideas Through the novel Wells invites readers to consider how a modern utopia could balance individual desires with collective well being and how society could be structured to encourage growth and development The tone of the novel is both reflective and engaging urging readers to contemplate the potential for creating a more just and equitable civilization where the pursuit of personal fulfillment is harmonized with societal progress *The Utopian Vision* Saint Thomas More,1983 To find out more information about Rowman Littlefield titles please visit us at www.rowmanlittlefield.com

The Province of All Mankind Stephen Buono,2025-07-15 The Province of All Mankind is the story of a powerful idea about the cosmos Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo this idea held that outer space should be preserved as a sanctuary from human strife free from weapons warfare and political rivalry If humanity could somehow leave violence behind as it moved into space perhaps peace would finally reign Bucking a half century of space race scholarship Stephen Buono argues that despite waging a totalizing Cold War the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation The early story of space politics is not primarily one of militarization but rather of political prescience and restraint The Province of All Mankind demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon

G. Wells and William Morris** Emelyne Godfrey, 2016-12-08 This book is about the fiercely contrasting visions of two of the nineteenth century s greatest utopian writers A wide ranging interdisciplinary study it emphasizes that space is a key factor in utopian fiction often a barometer of mankind s successful relationship with nature or an indicator of danger Emerging and critically acclaimed scholars consider the legacy of two great utopian writers exploring their use of space and time in the creation of sites in which contemporary social concerns are investigated and reordered A variety of locations is featured including Morris s quasi fourteenth century London the lush and corrupted island a routed and massacred English countryside the high rises of the future and the vertiginous landscape of another Earth beyond the stars **Virtual Realities and Their Discontents** Robert Markley, 1996 The recognition that cyberspace is a fiction a narrative that creates a coherence it would like to imagine really exists is crucial to any theoretically sophisticated critique of the limitations of this consensual hallucination and the discontents it imperfectly masks In this groundbreaking volume Robert Markley and his co authors set out to discover why cyberspace provokes often rapturous rhetoric but resists critical analysis Taking a variety of

approaches the authors explore the ways in which virtual realities conserve and incorporate rather than overthrow the assumptions and values of a traditional logocentric humanism the Platonist division of the world into the physical and metaphysical in which ideal forms are valued over material content Cyberspace David Porush suggests represents not a break with our metaphysical past but an extension of its basic theistic postulates Richard Grusin argues that the claims for new forms of electronic communication depend upon the very notions of authorship and subjectivity they claim to transcend N Katherine Hayles examines debates about cybernetics in the 1950s to demonstrate that the history of mind body ideas in the age of computers and feedback loops is itself conflicted David Brande analyzes cyberspace as an extension of the logic of late twentieth century capitalism And Robert Markley explores the entangled roots of cyberspace in the philosophy of mathematics One of the ironies of our culture's fascination with cyberspace is that our material and psychic investments in Virtual Reality suggest that the death of print culture or its disappearance into the matrix has been greatly exaggerated Cyberspace is unthinkable literally inconceivable without the print culture it claims to transcend It is in part a by product of a tradition of metaphysics that boats against the current bears us back relentlessly to our past Robert Markley from the introduction **Interdisciplinary Studies in the Humanities** Elizabeth Bayerl,1977 **Reflections of the Holocaust in Art and Literature** Randolph L.
